

Table of Contents

Introduction	1
Body Text	4
1. Dataset	4
1.1. Sample Selection	4
1.2. Data	4
1.3. Sample Properties	6
1.4. Considerations	6
2. Ly α Measurements	7
2.1. Line Detection	7
2.2. Line Profiles	8
2.3. Ly α Equivalent Width and Escape Fraction	9
3. The Ly α Equivalent Width Distribution	10
3.1. Bayesian Inference	10
3.2. Model Comparison	11
4. Ly α Emission Dependence on Galaxy Properties	16
4.1. Stellar Mass	16
4.2. SFR	18
4.3. UV Luminosity	22
4.4. Extinction	23
4.5. M $_*$ -SFR Sequence	28
5. On Ly α Dependence on Sample Selection	31
5.1. LBG Samples	31
5.2. Narrowband Samples	35
6. Inferences on $4 < z < 7$ LAEs fraction	36
Conclusion	42
Bibliography	44

List of Tables

1.	$\text{Ly}\alpha$ Equivalent Width distribution model comparison	11
2.	CANDELS bands used for LBG selection	32
3.	Summary of B-, V-, i-, and z-dropout samples	37

List of Figures

1.	Sample spectrum	5
2.	Redshift-Stellar Mass distribution of the sample	7
3.	Detection completeness and false positives	8
4.	$\text{Ly}\alpha$ Equivalent Width distribution model comparison	12
5.	Stellar Mass histogram	14
6.	$\text{Ly}\alpha$ Equivalent Width and Escape Fraction dependence on Stellar Mass	15
7.	$\text{Ly}\alpha$ Equivalent Width distribution dependence on Stellar Mass	16
8.	Star Formation Rate histogram	19
9.	$\text{Ly}\alpha$ Equivalent Width and Escape Fraction dependence on Star Formation Rate	20
10.	UV Luminosity histogram	23
11.	$\text{Ly}\alpha$ Equivalent Width and Escape Fraction dependence on UV Luminosity	24
12.	Extinction histogram	25
13.	$\text{Ly}\alpha$ Equivalent Width and Escape Fraction dependence on Extinction	26
14.	Sample distribution in the Stellar Mass-Star Formation Rate plane	29
15.	Monte Carlo characterization of $\text{Ly}\alpha$ emission in the Stellar Mass-Star Formation Rate plane	29
16.	$\text{Ly}\alpha$ selections induced by LBG surveys	33
17.	$\text{Ly}\alpha$ selections induced by LAE surveys	34
18.	Redshift histogram for CANDELS LBGs	37
19.	Fraction of $\text{Ly}\alpha$ emitting galaxies as a function of redshift	41
