

Contents

1	Introduction	1
1.1	Inverse problems	5
1.2	Optimal control problems	13
1.3	Contents of the thesis	20
1.3.1	Chapter 3: Size Estimates of an Obstacle in a Stationary Stokes Fluid.	21
1.3.2	Chapter 4: Turnpike Property for Two–Dimensional Navier–Stokes Equations.	23
1.3.3	Chapter 5: Inverse Viscosity Boundary Value Problem for the Evolutionary Stokes Equation.	24
2	Mathematical Theory of Incompressible Stokes and Navier–Stokes Equations	26
2.1	Function spaces and auxiliary results	26
2.2	The stationary Stokes equations	31
2.2.1	Stokes equations with homogeneous boundary conditions	31
2.2.2	Stokes equations with non homogeneous boundary conditions	33
2.2.3	The Stokes operator	35
2.3	The non stationary Stokes equations	38
2.4	The stationary Navier–Stokes equations	41
2.5	The non stationary Navier–Stokes equations	45
2.6	Linearized Navier–Stokes equations	47
3	Size Estimates of an Obstacle in a Stationary Stokes Fluid	50
3.1	Introduction	50
3.2	Main results	52
3.2.1	Preliminaries	52
3.2.2	Main results	54
3.3	Proofs of the main theorems	56
3.4	Proof of Proposition 3.8	62
3.5	Computational examples	70
4	Turnpike Property for Two–Dimensional Navier–Stokes Equations	76
4.1	Introduction	76
4.2	Optimal control problem and existence of solutions	78
4.2.1	Evolutionary optimal control for Navier–Stokes equations	78
4.2.2	Stationary optimal control problem for Navier–Stokes equations	82

4.3	Turnpike property for the two-dimensional Navier-Stokes problem with time-dependent control	85
4.4	Turnpike property for the two-dimensional Navier-Stokes problem with time-independent control	91
5	Inverse Viscosity Boundary Value Problem for the Evolutionary Stokes Equation	97
5.1	Introduction	97
5.2	Proof of Theorem 5.1	100
5.3	Perspective	109
6	Conclusions	110
	Bibliography	113
