

## TABLA DE CONTENIDO

<b>CAPÍTULO I. INTRODUCCIÓN.....</b>	<b>1</b>
1. Planteamiento del problema.....	6
2. Objetivos .....	8
3. Ubicación del área de estudio.....	8
4. Metodología.....	9
<b>CAPÍTULO II. “Stratigraphy, sedimentology, and geothermal reservoir potential of the volcanoclastic Cura-Mallín succession at Lonquimay, Chile” .....</b>	<b>11</b>
1. Introduction .....	12
2. Methodology.....	17
3. Stratigraphy and sedimentology.....	19
3.1. Guapitrío Formation .....	21
3.2. Río Pedregoso Formation.....	23
3.3. Mitrauquén Formation.....	40
4. Palaeocurrent directions and provenance areas.....	40
5. Potential geothermal reservoirs in the Cura-Mallín Group.....	42
6. Summary and conclusions.....	45
Acknowledgements.....	48
Bibliography.....	48
<b>CAPÍTULO III. Resumen de resultados.....</b>	<b>54</b>

## INDICE DE FIGURAS

### CAPÍTULO I.

Figura 1: Localización general de la zona de estudio.....	1
Figura 2: Edades y distribución de la Formación Cura-Mallín.....	3
Figura 3: Zona de estudio detallada.....	5

### CAPÍTULO II.

Figure 1: Generalized location and extension of the Cura-Mallín Basin in Chile and Argentina.....	13
Figure 2: Original stratigraphic scheme of Suárez and Emparan (1995).....	15
Figure 3: Topography of the Lonquimay Sub-basin, showing localities mentioned in text, measured stratigraphic sections, and dated samples.....	17
Figure 4: New stratigraphic subdivision of the Cura-Mallín Group.....	20
Figure 5: Stratigraphic succession in the Guapitrío Formation .....	21
Figure 6: Stratigraphic section (Lower Quilmahue).....	25
Figure 7: Stratigraphic section (Upper Quilmahue).....	26
Figure 8: Sedimentary features in the Quilmahue Member.....	28
Figure 9: Detrital zircon ages .....	29
Figura 10: Stratigraphic section measured (El Cajón).....	32
Figure 11: Stratigraphic section (Puente Tucapel).....	33
Figura 12: Stratigraphic section (Cerro Rucañanco).....	35
Figure 13: Sedimentary features in the Rucañanco Member.....	36
Figure 14: Stratigraphic section measured in the Bío-Bío Member at homonymous locality.....	38
Figure 15: Sedimentary features in the Bío-Bío Member.....	39

Figure 16: a) Partial geological map b) Oriented concretions; c) Mega-foresets of Gilbert-type deltas at Cerro Rucañanco; d) Rose-diagram of concretion orientations; e) Rose-diagram of mega-foreset orientations.....	41
Figure 17: Permeability of samples from the Río Pedregoso Formation as determined by the constant head and <i>TinyPerm</i> methods.....	44

### **CAPÍTULO III.**

Figura 1. Mapa geológico y perfil de la zona de estudio.....	55
Figura 2. Descripción petrográfica muestra 188 (El Cajón).....	60
Figura 3. Descripción petrográfica muestra 277 (El cajón).....	61
Figura 4. Descripción petrográfica muestra 285 (Puente Tucapel).....	62

## **INDICE DE TABLAS**

### **CAPÍTULO II.**

Table 1: Lithofacies description at Pedregoso (Upper and Lower Quilmahue profiles).....	27
Table 2: Lithofacies description at El Cajón.....	31
Table 3: Lithofacies description at Puente Tucapel.....	34
Table 4: Lithofacies description at Bio-Bio.....	39

### **CAPÍTULO III.**

Tabla 1: Formación Río Pedregoso.....	54
Tabla 2: Antecedentes paleontológicos de la Formación Río Pedregoso .....	58
Tabla 3: Permeabilidad y porosidad .....	59
