<b>1</b>	<b>Introduction</b>	<b>1</b>
1	Moral hazard in the Principal-Agent problem . . . . .	3
1.1	Discrete-time model . . . . .	3
1.1.1	Single time model . . . . .	3
1.1.1.1	Characterization of solutions: First-order approach	5
1.1.1.2	Existence of solutions . . . . .	6
1.1.1.3	Cost of moral hazard . . . . .	7
1.1.2	Repeated model . . . . .	8
1.1.2.1	Presence of memory . . . . .	9
1.1.2.2	Implementability of the long-term contract . . . . .	10
1.2	Continuous-time model . . . . .	10
1.2.1	Drift control: the model . . . . .	11
1.2.1.1	Martingale and dynamic programming approach .	13
1.2.1.2	Stochastic maximum principle approach . . . . .	14
1.2.2	Volatility control: the model . . . . .	16
1.2.2.1	Dynamic programming approach . . . . .	17
1.2.2.2	Contribution: the case of volatility uncertainty .	19
1.3	Perspectives . . . . .	20
2	Adverse selection in the Principal-Agent problem . . . . .	21
2.1	Pure adverse selection . . . . .	22
2.2	Application: power tarification under adverse selection . . . . .	24
2.3	Third-best problem: the temptation-value approach . . . . .	26
2.4	Application: third-best solution to bank monitoring . . . . .	28
2.5	Perspectives . . . . .	31
<b>I</b>	<b>Economic applications of the principal-agent model.</b>	<b>33</b>
<b>2</b>	<b>An adverse selection approach to power tarification</b>	<b>34</b>
2.1	Introduction . . . . .	34
2.2	General settings and optimal tariff . . . . .	36
2.2.1	Players' objectives and electricity particularity . . . . .	36
2.2.2	Notations and model assumptions . . . . .	37
2.2.3	Optimal tariffs . . . . .	38
2.3	Economical interpretations and numerical results . . . . .	40
2.3.1	Examples when the reservation utility is constant . . . . .	40

2.3.2	Examples when the reservation utility is concave . . . . .	41
2.3.3	Impact of competition when the reservation utility is constant . . . . .	42
2.3.4	Impact of cost of production when the reservation utility is constant .	43
2.4	Model specification . . . . .	44
2.4.1	Agent's problem . . . . .	45
2.4.2	The Principal's problem . . . . .	47
2.5	Agents with CRRA utilities and constant reservation utility . . . . .	48
2.5.1	General distribution of costs and Agent types . . . . .	50
2.5.2	An explicit example . . . . .	52
2.6	Agents with CRRA utilities and general reservation utility . . . . .	53
2.6.1	Strictly concave reservation utility . . . . .	57
2.6.1.1	The general tariff . . . . .	58
2.6.1.2	Power type cost function . . . . .	60
2.6.2	Extension to other cases of reservation utility . . . . .	62
2.7	Appendix . . . . .	64
2.7.1	u-convex analysis . . . . .	64
2.7.2	Proofs of Section 2.5 . . . . .	65
2.7.3	Proofs of Section 2.6 . . . . .	71
2.7.3.1	Technical results . . . . .	71
2.7.3.2	Proof of Theorem 2.6.1 . . . . .	76
<b>3</b>	<b>Bank monitoring incentives under moral hazard and adverse selection</b>	<b>81</b>
3.1	Introduction . . . . .	81
3.2	The model . . . . .	84
3.2.1	Preliminaries . . . . .	84
3.2.2	Description of the contracts . . . . .	85
3.2.3	Formulation of the investor's problem . . . . .	87
3.3	The pure moral hazard case . . . . .	87
3.3.1	The bank's problem . . . . .	88
3.3.1.1	Dynamics of the bank's value function . . . . .	88
3.3.1.2	Introducing feasible sets . . . . .	89
3.3.2	The investor's problem and the optimal full-monitoring contract . .	90
3.4	Credible set . . . . .	92
3.4.1	Definition of the credible set and its boundaries . . . . .	92
3.4.2	Utility of not monitoring . . . . .	93
3.4.3	Lower boundary of the credible set . . . . .	94
3.4.4	Upper boundary of the credible set . . . . .	94
3.4.4.1	HJB equation for the upper boundary . . . . .	96
3.4.4.2	Verification Theorem . . . . .	100
3.5	Optimal contracts . . . . .	100
3.5.1	Shutdown contract . . . . .	101
3.5.1.1	Value function of the investor . . . . .	102
3.5.1.1.1	Value function of the investor on the lower boundary	102
3.5.1.1.2	Value function of the investor on the upper boundary	103
3.5.1.1.3	Value function of the investor in the credible set . .	104
3.5.2	Screening contract . . . . .	106
3.5.2.1	Boundary study . . . . .	107

3.5.2.2	Study of the credible set . . . . .	108
3.5.3	Description of the optimal contracts . . . . .	109
3.5.3.1	Optimal contracts on the boundaries of the credible set . .	110
3.5.3.2	Optimal contracts in the interior of the credible set . . . .	112
3.6	Appendix . . . . .	113
3.6.1	Proofs for the pure moral hazard case . . . . .	113
3.6.2	Utility of not monitoring . . . . .	116
3.6.3	Short-term contracts with constant payment . . . . .	116
3.6.3.1	Optimal responses and feasible set . . . . .	117
3.6.3.2	Credible region under short-term contracts with constant payments . . . . .	118
3.6.3.3	Initial lump-sum payment . . . . .	119
3.6.4	Short-term contracts with delay . . . . .	119
3.6.4.1	Optimal responses and feasible set . . . . .	120
3.6.4.2	The upper boundary can be reached with contracts with delay	123
3.6.4.3	Credible region under contracts with delay . . . . .	124
3.6.5	Technical results for the lower boundary . . . . .	125
3.6.6	Technical results for the upper boundary . . . . .	127
3.6.7	Principal's value function on the boundary of the credible set . . . .	138
3.6.8	Extension: unbounded relationship between utilities of the banks .	145

## II Contributions to the continuous-time model. 147

4	Moral hazard under volatility uncertainty	148
4.1	Introduction . . . . .	148
4.2	Preliminaries . . . . .	150
4.2.1	Canonical process, semi-martingale measure and quadratic variation .	150
4.2.2	Weak formulation of the output process . . . . .	151
4.2.3	Estimate sets of volatility . . . . .	152
4.3	The contracting problem . . . . .	153
4.3.1	Admissible efforts . . . . .	154
4.3.2	Admissible contracts . . . . .	155
4.3.3	The problem of the Agent . . . . .	156
4.3.4	The problem of the Principal . . . . .	156
4.4	The Agent's problem: a 2BSDE's story . . . . .	157
4.4.1	Definition of the Hamiltonian . . . . .	157
4.4.2	2BSDEs representation of the Agent's problem . . . . .	158
4.5	The Principal's problem . . . . .	159
4.5.1	A pathological stochastic control problem . . . . .	159
4.5.2	Reformulation of the problem and the set of admissible contracts .	160
4.5.3	Degeneracy for disjoint beliefs . . . . .	161
4.5.4	Solution for common beliefs. . . . .	162
4.5.4.1	A natural restriction to piece-wise constant controls . . . . .	162
4.5.4.2	The intuitive HJBI equation . . . . .	164
4.5.4.3	The one dimensional case . . . . .	164
4.5.4.4	Perron's method . . . . .	165

4.6	Conclusion . . . . .	167
4.7	Appendix . . . . .	168
4.7.1	Functional spaces . . . . .	168
4.7.2	Proofs for the Agent's problem . . . . .	169
4.8	Proof of Lemma 4.5.1 . . . . .	172
4.9	Proof of Theorem 4.5.1 for the problem of the Principal . . . . .	174
