List of Figures	vii
1 Introduction	1
1.1 Motivation	1
1.2 Hypothesis, goals and methodology	2
1.2.1 Hypothesis	2
1.2.2 Main goal	3
1.2.3 Specific goals	3
1.2.4 Methodology	3
1.3 Thesis structure	4
2 State of the art and background	5
2.1 Types of tomography	5
2.1.1 Seismic Tomography	5
2.1.2 Ambient Noise Tomography	6
2.2 Ambient Noise Tomography Methodology	8
2.2.1 Data Acquisition	8
2.2.2 Pre-processing: Superficial waves estimation	11
2.2.3 Inverse Problem	13
2.2.4 Correction Process	16
2.3 Background	17
3 Synthetic scenario	19
3.1 Data acquisition	19
3.1.1 Homogeneous scenario	20
3.1.2 Heterogeneous scenarios	21
3.2 Pre-processing: Artificial surface wave estimation	21
3.2.1 Temporal normalization: One-bit method	22
3.2.2 Spectral normalization: Whitening	22
3.2.3 Crosscorrelation and stacking	23
3.3 Inverse problem	23
3.4 Correction and Adjusting results for visualization	24
4 Results and discussion	25
4.1 Data Acquisition	25
4.1.1 Homogeneous Medium	25
4.1.2 Heterogeneous Medium 1	27

4.1.3	Heterogeneous Medium 2	29
4.1.4	Parameter sensitivity analysis	31
4.2	Inversion Problem, correction and visualization	32
4.2.1	Homogeneous medium	33
4.2.2	Heterogeneous medium 1	35
4.2.3	Heterogeneous medium 2	37
4.2.4	Simulation using noise sources	41
5	Conclusion	45
5.1	Future work	46
6	Bibliography	47
