List of Tables	vii
List of Figures	ix
1 Introduction	1
1.1 Motivation	1
1.2 Research proposal	3
1.2.1 Proposal	3
1.2.2 Hypothesis	3
1.2.3 General and specific goals	4
1.3 Thesis structure	4
1.4 Contribution	5
1.4.1 Publications	5
2 State of the Art	6
2.1 Radar in Robotics	6
2.2 Radar Detection	7
2.2.1 Radar data representation	8
2.2.2 Stochastic adaptive detection with CFAR processors	11
2.2.3 Noise reduction techniques	16
2.3 Feature detection in 3D environments	21
2.3.1 Natural features	22
2.3.2 Artificial markers	23
2.4 Optimal Sub-pattern Assignment (OSPA) map metric	25
3 Binary Integration Noise Reduction	27
3.1 Integrating BI with spectral noise subtraction	27
3.2 Implementation and computational complexity	29

3.2.1	Wiener filter implementation and complexity	30
3.2.2	Wavelet denoising implementation and complexity	31
3.2.3	BINR implementation and complexity	32
3.2.4	Experimental computational time results	33
3.3	Noise reduction and detection in scanning radar data	34
3.3.1	Noise reduction in scanning radar data	34
3.3.2	Target detection in scanning radar data	39
3.4	Noise reduction and detection in SAR data	43
4	Detecting lidar features with a Constant False Alarm Rate in 3D point cloud data	49
4.1	Introduction	49
4.2	Laser surveying in 3D	54
4.2.1	Point based registration	54
4.2.2	Feature based registration	55
4.2.3	The 3D point cloud data and the sparsity problem	56
4.3	CFAR-based detector for lidar	57
4.3.1	Lidar target noise distributions	58
4.4	Adaptation of CFAR algorithms to 3D scenes	60
4.4.1	Projecting 3D range and intensity information into 2D spaces	61
4.4.2	Adaptive Window CFAR	62
4.4.3	Direct application of CFAR in 3D space	64
4.5	Benchmark algorithms and a comparison metric	66
4.5.1	Methods' performance assessment, feature extraction and comparison metric	68
4.6	Simulated data	71
4.6.1	Equidistant target simulation results	73
4.6.2	Non-equidistant target simulation results	88
4.7	Indoor laboratory environment test	96
4.7.1	Indoor laboratory environment results	97
4.8	Mine environment test	111
4.8.1	First section results	113
4.8.2	Second section results	126
4.9	Overall discussion on the CFAR methods' performance	139

5	Conclusions	141
5.1	Final analysis and remarks	141
5.2	Future work	142
6	Bibliography	144
A	BINR paper	155
B	Underground Mine Dataset paper	168
C	Sensors specifications	177
C.1	Acumine High Speed Scanning Radar	177
C.2	UAVSAR	178
C.3	Riegl VZ-400 ladar	179
D	Normalized OSPA metric	181
