

Diterpenes from *Haplopappus chrysanthemifolius*

Faini, Francesca

Labbé, Cecilia

Torres, René

Delle Monache, Franco

Delle Monache, Giuliano

Three new diterpenes were isolated from the aerial part of *Haplopappus chrysanthemifolius* and assigned the structures 6 β -hydroxy-ent-labd-8(17)-en-15-oic acid, 3 β -acetoxy-ent-labd-8(17)-en-15-oic acid and 18 β -acetoxy-labd-8(17)-en-15-oic acid. The structures were elucidated by high field NMR spectroscopy.
