| Índice de Tablas  | XII      |
| Índice de Figuras   | XIV      |
| <b>1 Introducción</b>   | <b>1</b> |
| 1.1 Teoría básica . . . . .   | 2        |
| 1.1.1 Ecuaciones de movimiento . . . . .  | 3        |
| 1.1.2 Generación de Tsunamis . . . . .  | 4        |
| 1.1.3 Inundación y run-up . . . . .   | 5        |
| 1.2 Publicaciones resultantes de este trabajo . . . . .   | 7        |
| 1.3 Exposición en congresos . . . . .   | 8        |
| <b>2 A Study of the 2015 <math>M_w</math> 8.3 Illapel Earthquake and Tsunami: Numerical and Analytical Approaches</b> | <b>9</b> |
| Abstract . . . . .  | 10       |
| 2.1 Introduction . . . . .  | 10       |
| 2.1.1 Previous studies . . . . .  | 11       |
| 2.2 Slip Distribution Solution . . . . .  | 12       |
| 2.2.1 USGS Solution . . . . .   | 12       |

|          |   |           |
|----------|---|-----------|
| 2.2.2    | Berkeley Solution . . . . .   | 12        |
| 2.3      | Tsunami Modeling . . . . .  | 13        |
| 2.3.1    | Numerical Modeling and Setup . . . . .  | 13        |
| 2.3.2    | Analytical Modeling . . . . .   | 13        |
| 2.3.3    | Field Observations . . . . .  | 14        |
| 2.4      | Tsunami Run-up Inversion . . . . .  | 15        |
| 2.5      | Results . . . . .   | 16        |
| 2.6      | Discussion and Conclusions . . . . .  | 18        |
|          | Acknowledgments . . . . .   | 20        |
| 2.7      | References . . . . .  | 20        |
| <b>3</b> | <b>Simple estimation of linear 1+1 D long wave run-up</b>   | <b>22</b> |
|          | Abstract . . . . .  | 23        |
| 3.1      | Introduction . . . . .  | 23        |
| 3.2      | Mathematical Derivation . . . . .   | 24        |
| 3.3      | Initial Waves Tested . . . . .  | 25        |
| 3.3.1    | Analytical solution: Parabolic wave . . . . .   | 25        |
| 3.3.2    | Gaussian pulse . . . . .  | 25        |
| 3.3.3    | Solitary wave . . . . .   | 25        |
| 3.3.4    | N-waves . . . . .   | 25        |
| 3.3.5    | A case study: The 2014 $M_W = 8.2$ Iquique earthquake . . . . .                                   | 26        |
| 3.4      | Discussion and Conclusions . . . . .  | 28        |
|          | Acknowledgements . . . . .  | 29        |
| 3.5      | References . . . . .  | 29        |
|          | Appendix A: Detailed mathematical derivation . . . . .  | 29        |
|          | A1 The still water shoreline (SWS) motion $(\eta(0, t))$ . . . . .                                | 29        |
|          | A2 The approximated shoreline velocity $u(0, t)$ . . . . .  | 31        |
