Table of content

Introducción 1

1. Background 3

1.1. Arc Welding . . . 3

1.1.1. Flux cored arc welding . . . 4

1.1.2. Welding defects . . . 5

1.2. Machine learning . . . 6

1.3. Dense neural network . . . 6

1.3.1. Overfitting, Underfitting and Regularisation . . . 7

1.3.2. Hyperparameters . . . 7

1.3.3. Convolutional Neural Networks . . . 10

1.4. Auto encoders . . . 11

1.4.1. Definition . . . 11

1.5. Denoising Auto encoders. . . . 13

1.6. Varational Auto encoders. . . . 14

1.6.1. KL divergence. . . . 14

1.6.2. Review of the state of the art of machine learning applied to detect welding defects . . . 17

2. Methodology 19

2.1. Methodology summary . . . 19

2.1.1. Experimental setup . . . 21

2.1.2. Treatment of the data . . . 22

3. Experimental results 24

3.1. Welding results . . . 24

3.1.1. Welding current and voltage graphs . . . 27

3.1.2. Measurement of torch position . . . 35

4. Results of classical statistics machine learning for outlier prediction 36

4.1. Data preprocessing . . . 37

4.2. Feature extraction and visualization . . . 39

4.3. Normal statistics Time domain results . . . 40

4.4. Normal statistics Frequency domain results . . . 41

5. Data labeling and preprocessing for deep learning. 42

5.1. Identification of the welds to be studied. 43
5.1.1. Welding images 43
5.1.2. Fourier transform. 49
5.1.3. Spectrogram. 49
5.1.4. Wavelet transform. 52
5.2. Phase array inspection. 55
5.3. Relation with the Phased Array 55
5.3.1. Summary of the preprocessing. 57
5.3.2. Data set for train test 57

6. Discontinuities detection. **58**
6.1. Auto Encoder results 59
6.1.1. Electrical welding signals implementation 59
6.1.2. Results scalograms - Auto encoders 59
6.1.3. Results spectrograms - Auto encoders 63
6.2. Denoising Auto encoders. 66
6.2.1. Results scalograms - Denoising Auto encoders. 66
6.2.2. Results spectrograms - Denoising Auto encoders. 68
6.3. Varational Auto encoders. 70
6.3.1. Results Varational autoencoder. 70
6.4. Explore the state of the art of the industry. 72
6.5. Discussion and comparison of the implemented methods. 73
6.6. Final implementation. 74
6.6.1. Confidence interval 77
6.6.2. Optimized Results 80 - 57 - 63 - 56 (Good) 79
6.6.3. Optimized Results 80 - 63 - 62 - 65 (Lack of fusion) 80
6.6.4. Optimized 80 - 53 - 54 - 56 (Undercut) 81
6.7. Final discussion anomaly detection. 82

7. Discontinuities classification. **83**
7.1. Dense neural network implementation and optimization 84
7.2. Discussion 87

Conclusión **88**
7.3. Lab work 88
7.4. Identification of discontinuities 89
7.5. Classification of discontinuities 90

bibliografía **90**
