

TABLE OF CONTENT

1. INTRODUCTION	1
<i>1.1. Context, presentation of the scientific problem and working hypotheses</i>	1
<i>1.2. Objectives</i>	5
<i>1.3. Methodologies</i>	5
2. TECTONOSTRATIGRAPHY OF THE NORTERN CHILE WESTERN CORDILLERA: CENTRAL ANDES AT 19°S	
<i>2.1. Introduction</i>	7
<i>2.2. Cenozoic Tectonostratigraphic evolution and architecture of the Central Andes in Northern Chile based on the Aquine Region, Western Cordillera (19°S-19°30'S).....</i>	8
3. UNDERLYING ASSUMPTIONS, SUBDUCTION WEDGE MODELS, ANALOGUE MODELING METHODOLOGY AND ANALOGUE MODELING RESULTS	44
<i>3.1. Subduction wedge models</i>	45
<i>3.2. A “faultless” accretionary wedge: analogue modeling methodology and results</i>	51
<i>3.3. Comparison with prototypes</i>	57
<i>3.4. Accretionary flux and material distribution within a subduction wedge</i>	60
<i>3.5 Important aspects in the growth of a subduction wedge and modes of accretion</i>	62
<i>3.6 Wedge coalescence</i>	65
4. EXPANSION AND COALESCENCE OF OROGENIC WEDGES IN THE CENTRAL ANDES	69
<i>4.1 Introduction</i>	69
<i>4.2 Expansion and Coalescence of Orogenic Wedges in the Central Andes</i>	70
5. DISCUSSION	121
<i>5.1. Experimental limitations</i>	121
<i>5.2. A comparison between the model and the high Andes of northern Chile</i>	124
<i>5.3. Further research</i>	135
6. CONCLUSIONS	137
7. BIBLIOGRAPHY	138
