

Table of Contents

- 1. Introduction** **1**

- 2. Model** **6**
 - 2.1. Model description 6
 - 2.2. The traders' dynamic maximization problem 8
 - 2.3. Numerical parameterization of the trading game 10

- 3. Results** **12**
 - 3.1. Market Quality 12
 - 3.2. Trading Behaviour 17
 - 3.3. Welfare 26

- 4. Conclusion** **32**

- Bibliography** **32**

- Appendix** **36**
 - 2.1. Model description 36
 - 2.2. Equilibrium 37
 - 2.3. Extension for two markets 39

Index of Tables

1.	Market quality measures	13
2.	Fundamental value estimations	15
3.	Trading behavior measures	18
4.	Strategies per trader type	21
5.	Traders' behavior differentiated by private value	22
6.	Average proportion of agents who switch from one market to another	24
7.	Liquidity Supply - OLS Regression	24
8.	Liquidity Demand - OLS Regression	25
9.	Average payoff, waiting cost and money transfer per trader type	28
10.	Welfare per trader type	30
