<b>List of Tables</b>	<b>vi</b>
<b>List of Figures</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Astronomical data analysis . . . . .	1
1.2 Astronomical software development . . . . .	2
1.3 Thesis description . . . . .	3
1.3.1 Goals and objectives . . . . .	3
1.3.2 Research questions . . . . .	4
1.3.3 Software architecture . . . . .	4
1.3.4 Use of previous work . . . . .	5
1.3.5 Programming languages . . . . .	5
1.3.6 Validation of results . . . . .	5
<b>2 Literature revision</b>	<b>8</b>
2.1 Existing software . . . . .	9
2.2 Criticism of existing solutions . . . . .	15
<b>3 Astronomical data and analysis</b>	<b>17</b>
3.1 Astronomical data . . . . .	17
3.1.1 Astronomical images . . . . .	17
3.1.2 Astronomical spectra . . . . .	18
3.2 Astronomical image acquisition . . . . .	19
3.3 Astronomical image reduction . . . . .	21
3.4 Astronomical image processing . . . . .	22
3.4.1 Image arithmetic and combining . . . . .	23
3.4.2 Filter application . . . . .	24
3.4.3 Photometry . . . . .	25
3.4.4 Light curve or time series generation . . . . .	29
<b>4 Introduction to General-Purpose Graphics Processing Unit (GPGPU) computing</b>	<b>30</b>
4.1 What is the Graphics Processing Unit (GPU)? . . . . .	30
4.2 General-Purpose GPU computing (GPGPU) . . . . .	33
4.3 GPGPU use in astronomy . . . . .	34
4.3.1 GPGPU use for astronomical data analysis in this thesis . . . . .	35

<b>5</b>	<b>Software design and implementation</b>	<b>36</b>
5.1	Data handling: <code>AstroFile</code> and <code>AstroDir</code> classes . . . . .	36
5.2	Calibration image combination and obtention of <i>Master</i> fields . . . . .	37
5.3	Astronomical image reduction . . . . .	39
5.3.1	CPU reduction implementation . . . . .	40
5.3.2	GPU reduction implementation . . . . .	40
5.4	Light curve obtention: the <code>Photometry</code> object . . . . .	41
5.4.1	Data handling for light curve obtention . . . . .	42
5.4.2	Obtaining target data stamps . . . . .	43
5.4.3	Reduction process using stamps . . . . .	45
5.4.4	Aperture photometry . . . . .	45
5.4.5	Light curve data handling and visualization: the <code>TimeSeries</code> object . . . . .	47
5.5	Graphical User Interface . . . . .	49
<b>6</b>	<b>Experimental settings</b>	<b>52</b>
6.1	Validation of results . . . . .	52
6.1.1	Experiment 1: Validation of reduction results . . . . .	53
6.1.2	Experiment 2: Light curve evaluation . . . . .	54
6.1.3	Experiment 3: Comparison between FADRA's CPU and GPU photometry implementations . . . . .	55
6.2	Execution time comparison . . . . .	56
6.3	Platforms . . . . .	56
<b>7</b>	<b>Results</b>	<b>57</b>
7.1	Validation of FADRA results . . . . .	57
7.1.1	Experiment 1: Validation of reduction results . . . . .	57
7.1.2	Experiment 2: Light curve evaluation . . . . .	59
7.1.3	Experiment 3: Comparison between FADRA's CPU and GPU photometry implementations . . . . .	61
7.2	Execution time comparison . . . . .	62
7.2.1	Reduction . . . . .	62
7.2.2	Light curve generation . . . . .	64
<b>8</b>	<b>Conclusions</b>	<b>65</b>
8.1	Development of basic algorithms for astronomical data analysis . . . . .	65
8.2	Implementation of algorithms for light curve obtention . . . . .	67
8.3	GPU implementation of algorithms . . . . .	68
8.4	Future work . . . . .	70
8.4.1	Within the scope of this thesis . . . . .	70
8.4.2	The FADRA framework . . . . .	72
	<b>Bibliography</b>	<b>73</b>
<b>A</b>	<b>Details of results</b>	<b>80</b>
A.1	Validation of reduction results . . . . .	80
A.2	Execution time results . . . . .	80

# List of Tables

6.1	Datasets used for experiments . . . . .	53
7.1	Mean, median, and standard deviation for reduction results . . . . .	59
7.2	AstroPy and FADRA’s CPU light curve results comparison . . . . .	61
7.3	FADRA’s CPU and GPU light curve results comparison . . . . .	62
A.1	NRMSE for reduction result validation . . . . .	80
A.2	Reduction execution times . . . . .	81
A.3	Light curve obtention execution times . . . . .	81
A.4	Average execution time for reduction . . . . .	81
A.5	Average execution time for light curve obtention . . . . .	81

# List of Figures

3.1	Diagram of a spectrograph . . . . .	18
3.2	Diagram of a telescope . . . . .	19
3.3	Diagram of a CCD detector . . . . .	20
3.4	Wavelength filters . . . . .	20
3.5	Example of the reduction process . . . . .	22
3.6	Gaussian kernel . . . . .	25
3.7	Air mass . . . . .	26
3.8	Raw vs. differential photometry . . . . .	27
3.9	Target, sky annulus, and reference star selection for photometry . . . . .	28
4.1	Host and devices on GPU computing . . . . .	31
4.2	Memory on a GPU . . . . .	32
4.3	Work-items and work-groups on a GPU . . . . .	33
5.1	The <code>AstroFile</code> and <code>AstroDir</code> classes . . . . .	38
5.2	The <code>Photometry</code> object . . . . .	41
5.3	Data stamps for aperture photometry . . . . .	43
5.4	Data stamps following targets . . . . .	44
5.5	Data stamp parameters . . . . .	45
5.6	The <code>TimeSeries</code> class . . . . .	47
5.7	GUI for <code>AstroDir</code> creation . . . . .	49
5.8	GUI showing loaded <code>AstroDir</code> objects . . . . .	50
5.9	GUI for photometry targets selection . . . . .	50
5.10	GUI for aperture photometry parameters selection . . . . .	51
5.11	Example of light curves for two targets . . . . .	51
7.1	NRMSE between <code>AstroPy</code> and FADRA CPU reduction results . . . . .	58
7.2	NRMSE between FADRA's CPU and GPU reduction results . . . . .	60
7.3	Execution times for reduction algorithms . . . . .	63
7.4	Execution times for light curve obtention . . . . .	64
