

# Table of Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Supernova . . . . .	1
1.1.1	Background and classification . . . . .	1
1.1.2	Thermonuclear Supernovae: Type Ia . . . . .	5
1.1.3	Core-collapse Supernovae: II, Ib, Ic . . . . .	7
1.2	Cosmology and supernova . . . . .	15
1.2.1	Brief Review of modern cosmology . . . . .	16
1.2.2	SNe Ia and cosmology . . . . .	21
1.2.3	Actual picture of our Universe . . . . .	26
1.2.4	SNe II and cosmology . . . . .	28
1.3	Goals of this dissertation . . . . .	31
<b>2</b>	<b>Observations and Supernovae sample</b>	<b>33</b>
2.1	Carnegie Supernova Project (CSP) . . . . .	33
2.1.1	Data reductions . . . . .	34
2.2	Sloan Digital Sky Survey-II SN Survey (SDSS-II) . . . . .	41
2.3	Supernova Legacy Survey (SNLS) . . . . .	42
<b>3</b>	<b>Methodology and Procedure</b>	<b>48</b>
3.1	Methodology . . . . .	48

3.2	Theoretical derivation . . . . .	50
3.3	Procedure . . . . .	53
<b>4</b>	<b>The Photometric Color Method</b>	<b>62</b>
4.1	Methodology . . . . .	63
4.2	Low redshift Hubble diagram . . . . .	67
4.3	High redshift Hubble diagram using the PCM . . . . .	77
4.3.1	Fixed cosmology . . . . .	78
4.3.2	$\Omega_m$ derivation . . . . .	81
<b>5</b>	<b>The Standard Candle Method</b>	<b>83</b>
5.1	Photospheric expansion velocities . . . . .	83
5.2	Methodology . . . . .	87
5.3	Low redshift Hubble diagram . . . . .	88
5.4	All sample Hubble diagram . . . . .	91
5.4.1	Fixed cosmology . . . . .	91
5.4.2	$\Omega_m$ derivation . . . . .	93
<b>6</b>	<b>Discussion</b>	<b>95</b>
6.1	Low redshift . . . . .	95
6.1.1	Methods comparison . . . . .	95
6.1.2	SCM comparison . . . . .	97
6.1.3	Low number effects . . . . .	98
6.1.4	Low $R_V$ . . . . .	101
6.2	High redshift . . . . .	101
6.2.1	Sample comparison . . . . .	101
6.2.2	PCM versus SCM . . . . .	102
6.2.3	SCM versus others works . . . . .	104

6.2.4	$H\beta$ velocity: A and $\gamma$ correlation . . . . .	105
6.2.5	Sensitivity to progenitor metallicity? . . . . .	107
6.2.6	Combined SNe Ia and SNe II Hubble diagram . . . . .	108
6.2.7	Malmquist bias . . . . .	109
<b>7</b>	<b>Summary</b>	<b>112</b>
<b>A</b>	<b>Host galaxy extinction</b>	<b>114</b>
A.1	Spectroscopic methods . . . . .	115
A.1.1	Na I D measurement . . . . .	115
A.1.2	Models fitting. . . . .	115
A.2	Photometric methods . . . . .	117
A.2.1	Colour-time method . . . . .	119
A.2.2	colour-colour method . . . . .	120
A.2.3	Multi bands fit method . . . . .	126
A.3	Comparisons and conclusions . . . . .	128
	<b>Bibliography</b>	<b>130</b>

# List of Figures

1.1	Crab nebula . . . . .	3
1.2	Classification scheme of SNe . . . . .	4
1.3	Phillips relationship & SNe Ia optical-light curve from Calá-Tololo . . .	8
1.4	Massive star structure . . . . .	9
1.5	Core-collapse scenario. . . . .	10
1.6	Supernovae light curve taxonomy . . . . .	11
1.7	SNe II plateau. . . . .	13
1.8	P-Cygni profile . . . . .	14
1.9	Supernovae spectra diversity . . . . .	15
1.10	Cosmological Microwave Background map from Planck . . . . .	16
1.11	Luminosity distance . . . . .	20
1.12	Hubble law . . . . .	22
1.13	SNe Ia light curve after standardisation . . . . .	23
1.14	High redshift Hubble diagram from the Supernova Cosmology Project team . . . . .	24
1.15	More recent SNe Ia Hubble diagram from Betoule et al. 14 . . . . .	25
1.16	Universe components . . . . .	27
1.17	Universe components evolution . . . . .	27
1.18	Expansion velocity-luminosity correlation . . . . .	29
1.19	Theoretical expansion velocity-luminosity correlation . . . . .	30

1.20	HD using SCM and SNe II . . . . .	30
1.21	$(\Omega_m, \omega)$ confidence regions: SNe Ia, CMB, BAO . . . . .	32
2.1	CSP, SDSS-II, SNLS filters band-pass . . . . .	36
2.2	CSP light-curves example . . . . .	37
2.3	CSP summary photometry . . . . .	38
2.4	CSP summary spectroscopy . . . . .	40
2.5	SDSS-II spectra and LC . . . . .	42
2.6	SNLS spectra and LC . . . . .	44
2.7	Pie chart: total sample . . . . .	45
3.1	K correction effect . . . . .	50
3.2	Procedure AKS . . . . .	59
3.3	AKS spectra model comparison . . . . .	61
4.1	Absolute magnitude- $s_2$ correlation from Anderson et al. (2014b) . . . . .	63
4.2	Absolute magnitude- $s_2$ correlation for all the sample . . . . .	64
4.3	$s_2$ fitting . . . . .	65
4.4	RMS dispersion for different filters (CSP sample) . . . . .	69
4.5	RMS dispersion for different colours (CSP sample) . . . . .	70
4.6	Optical Hubble diagram using the PCM for CSP sample . . . . .	72
4.7	NIR Hubble diagram using the PCM for CSP sample . . . . .	74
4.8	Combined Hubble diagram . . . . .	75
4.9	Tully-Fisher distance vs Cepheid distances . . . . .	77
4.10	Hubble diagram using the PCM for the entire sample: CSP, SDSS, and SNLS . . . . .	80
4.11	Fitting parameters using the PCM and the entire sample . . . . .	82
5.1	Correlation between $v_{Fe}$ and $v_{H\beta}$ . . . . .	85

5.2	H $\beta$ velocity measurement . . . . .	86
5.3	Optical Hubble diagram using the SCM for CSP sample . . . . .	89
5.4	NIR Hubble diagram using the SCM for CSP sample . . . . .	90
5.5	Hubble diagram using the SCM for the entire sample: CSP, SDSS, and SNLS . . . . .	92
5.6	Fitting parameters using the SCM and the entire sample . . . . .	94
6.1	PCM SCM comparison for CSP sample and $r$ band . . . . .	96
6.2	PCM SCM comparison for CSP sample and $Y$ band . . . . .	97
6.3	Boostrapping simulation . . . . .	100
6.4	Different values of $R_V$ obtained using different filters and colours . . . . .	102
6.5	Comparison of the CSP, SDSS and SNLS samples . . . . .	103
6.6	Distance moduli comparison: PCM vs SCM . . . . .	104
6.7	$\gamma$ versus $A$ correlation . . . . .	106
6.8	Metallicity correlation . . . . .	108
6.9	SNe Ia versus SNe II . . . . .	109
6.10	Malmquist bias . . . . .	111
A.1	Avh using theoretical model . . . . .	117
A.2	Avh comparison using two different models . . . . .	118
A.3	Avh from Colour time method . . . . .	121
A.4	$(B - V)$ vs $(V - Y)$ diagram using our theoretical model . . . . .	122
A.5	$(B - V)$ vs $(V - Y)$ diagram with CSP sample . . . . .	124
A.6	Avh multi bands fit . . . . .	126
A.7	Avh comparison methods . . . . .	129

# List of Tables

2.1	Supernovae sample . . . . .	46
2.1	Supernovae sample . . . . .	47
4.1	PCM-fit Parameters . . . . .	79
6.1	SCM-fit Parameters . . . . .	105
A.1	Host galaxy extinction . . . . .	127
A.1	Host galaxy extinction . . . . .	128
