

# Contents

<b>Introduction</b>	<b>1</b>
<b>1 Introduction to some concepts in Mechanical Spectroscopy</b>	<b>3</b>
1.1 Internal friction . . . . .	3
<b>2 Elasticity and anelasticity in solids</b>	<b>7</b>
2.1 Ideal Elasticity . . . . .	7
2.2 Anelasticity . . . . .	8
2.2.1 Anelastic relaxation . . . . .	8
2.2.2 Anelastic dynamic response . . . . .	9
2.2.3 Mechanical models of anelasticity . . . . .	11
2.2.4 Origin of anelastic behaviour . . . . .	14
2.2.5 Properties of the anelastic solid as function of temperature . . . . .	15
<b>3 Influence of lattice periodicity on dislocations</b>	<b>16</b>
3.1 Peierls-Nabarro dislocation model . . . . .	16
3.1.1 Stress and displacement in the core . . . . .	17
3.1.2 Elastic energy in Peierls Nabarro model . . . . .	20
3.1.3 Criticism to Peierls Nabarro Model . . . . .	23
<b>4 The Bordoni peak</b>	<b>24</b>
4.1 Characteristics of the Bordoni Peak . . . . .	25
4.2 Seeger's theory of the Bordoni Peak . . . . .	25
4.2.1 Connection of Seeger's theory with experiment . . . . .	29
4.3 Bordoni Peak and experiments . . . . .	29
<b>5 Molecular Dynamics simulation</b>	<b>30</b>
5.1 Preparation of samples . . . . .	31
5.2 Finding hysteresis in Cu . . . . .	32
5.3 Estimation of internal friction . . . . .	35
5.3.1 Estimation of $\Delta W$ . . . . .	35
5.3.2 Estimation of $W$ . . . . .	40
5.3.3 Estimation of $\tan \phi$ . . . . .	42
5.3.4 Limitations of estimation . . . . .	42
5.4 Simulation of internal friction . . . . .	42
5.4.1 Limitations of simulation . . . . .	45

Conclusion	49
Bibliography	51
Appendices	54
A Time lengths for simulations	55
B Partial dislocations in FCC metals	56
