

# Table of Contents

List of Tables .....	vi
List of Figures .....	vii
<b>Chapter 1. Introduction .....</b>	<b>1</b>
1.1. Research hypothesis .....	2
1.2. Objectives .....	3
General objective .....	3
Specific objectives .....	3
1.3. Thesis structure .....	3
<b>Chapter 2. Forecasting Methods for Grid-Connected Photovoltaic Systems</b> .....	<b>4</b>
2.1. Uncertainty and variability of the output power in PV-PPs .....	4
2.2. Forecasting methods in PV-PPs .....	6
Numerical methods .....	6
ANN-based methods .....	7
Autoregressive methods .....	9
Synthetic series .....	11
Kernel density estimation method .....	12
2.3. Discussion and proposal .....	13
<b>Chapter 3. Models .....</b>	<b>15</b>
3.1. Forecasting model .....	16
CSI-ANN .....	18
GSR-ANN .....	21
3.2. Control Model .....	28
MICAPAS .....	29
Deload level .....	31
Control of PV section .....	34
<b>Chapter 4. Methodology .....</b>	<b>39</b>
Dynamic modeling .....	39
Worst-case scenario selection .....	40
Hourly dispatch .....	41
Dynamic simulations .....	42
<b>Chapter 5. Case study .....</b>	<b>43</b>
5.1. Forecasting case study .....	46
5.2. Control Case Study .....	48

<b>Chapter 6. Results .....</b>	<b>50</b>
6.1. Forecasting .....	50
6.2. Control.....	55
<b>Chapter 7. Conclusions.....</b>	<b>61</b>
7.1. Future work .....	62
<b>List of Acronyms .....</b>	<b>63</b>
<b>Bibliography .....</b>	<b>64</b>
<b>Appendix A. Concepts and definitions.....</b>	<b>69</b>
<b>Appendix B. Generation of PV-PPs radiation data .....</b>	<b>71</b>

# List of Tables

Table 3.1: Classification and description by clear-sky index. .... 18

Table 3.2: Available data for the CSI-ANN construction. .... 18

Table 3.3: Available data for the GSR-ANN construction. .... 21

Table 3.4: Best neural networks for each kind of day. .... 27

Table 5.1: Maximum power of PV-PPs during the different operation scenarios. 44

Table 5.2: Used ANNs for each PV-PP sector. .... 45

Table 5.3: Sites characteristics. .... 47

Table 5.4: Total 10-min data for kind of day. .... 47

Table 5.5: PV-PPs in dynamic simulations and maximum power. .... 48

Table 5.6: Considered scenarios for the study. .... 49

Table 6.1: NMSE per CSI-ANN. .... 50

Table 6.2: Number of measures and computational burden in each kind of day. 52

Table 6.3: NMSE between forecasted and real values per GSR-ANN for every  
type of day. .... 52

Table 6.4: Maximum PV penetration, amount of time below 49.8 Hz and amount  
of time above 50.2 Hz for every operation scenario. .... 57

## List of Figures

Figure 2.1: Global solar radiation under clear sky and real conditions. ....	5
Figure 2.2: Different sigmoid response curves. ....	8
Figure 2.3: Three-layer feedforward neural network.....	8
Figure 2.4: Summary-diagram of the spatial and temporal resolutions for each reviewed forecasting technique.....	14
Figure 3.1: Diagram of the work-related models.....	15
Figure 3.2: Schematic diagram of forecasting model. ....	17
Figure 3.3: Spearman rank correlation between CSI and other variables. ....	19
Figure 3.4: Clear-sky index sample partial autocorrelation function. ....	19
Figure 3.5: CSI ANN performance in the training, validation and test sets.....	20
Figure 3.6: CSI-ANN diagram.....	21
Figure 3.7: Spearman Rank Correlation between GSR and other variables (left) and sample partial autocorrelation (right) for sunny days. ....	22
Figure 3.8: Spearman rank correlation between GSR and other variables (left) and sample partial autocorrelation (right). Cloudy days on top and overcast days in the bottom. ....	23
Figure 3.9: 5-fold cross-validation process with two sets: training and test. ....	24
Figure 3.10: Training and test performances of GSR ANN for Overcast (top), Cloudy (middle) and Sunny (bottom) days. The mean performance given the 10-fold cross-validation per node (left) and the standard deviation (std) of the performance per node (right).....	25
Figure 3.11: NMSE for validation, train and test performances for each fold. From top to bottom and left to right are shown the best fit GSR ANNs for overcast, cloudy and sunny days. ....	26
Figure 3.12: GSR-ANNs diagrams. ....	27
Figure 3.13: Diagram of control model. ....	28
Figure 3.14: PV-PP with a microinverter architecture.....	29
Figure 3.15: MICAPAS schematic. ....	30
Figure 3.16: (a) Clear-sky day conditions during a summer day in northern Chile and (b) 10-minute ramps during a clear-sky day.....	32
Figure 3.17: Radiation ramps during a year. ....	32
Figure 3.18: Deload level versus radiation ramp in 10 minutes. ....	34
Figure 3.19: PV section configuration.....	35
