<b>Introduction</b>	<b>1</b>
On the Klee-Saint Raymond's Characterization of Convexity . . . . .	1
On Brøndsted-Rockafellar's Theorem for convex lower semicontinuous epi- pointed functions in locally convex spaces . . . . .	4
Extensions of Zagrodny's Mean Value Theorem, integration theorems and characterization of convexity for a generalized subdifferential of functions de- fined in locally convex spaces . . . . .	6
A complete characterization of the subdifferential of convex integral functions	10
Sequential formulae for subdifferential calculus of nonconvex integral functionals	13
Subdifferential characterization of probability functions under Gaussian dis- tribution . . . . .	17
<b>1 Notation and preliminary results</b>	<b>24</b>
1.1 Topological and convex tools . . . . .	24
1.2 Subdifferential theory . . . . .	26
1.3 Epi-pointed functions . . . . .	29
1.4 Measure theory . . . . .	33
<b>2 On the Klee-Saint Raymond's Characterization of Convexity</b>	<b>38</b>
2.1 Introduction . . . . .	38
2.2 The characterization of convexity . . . . .	39
<b>3 On Brøndsted-Rockafellar's Theorem for convex lower semicontinuous epi- pointed functions in locally convex spaces</b>	<b>46</b>
3.1 Introduction . . . . .	46
3.2 Brøndsted-Rockafellar's Theorem and consequences . . . . .	49
3.3 Banach spaces . . . . .	54
<b>4 Extensions of Zagrodny's Mean Value Theorem, integration theorems and characterization of convexity for a generalized subdifferential of functions defined in locally convex spaces</b>	<b>56</b>
4.1 Subdifferential on locally convex spaces . . . . .	56
<b>5 A complete characterization of the subdifferential of convex integral func- tions</b>	<b>70</b>
5.1 Introduction . . . . .	70
5.2 Preliminary results . . . . .	72

5.3	Characterization via $\varepsilon$ -subdifferentials . . . . .	75
5.4	Suslin spaces or discrete measure space . . . . .	81
5.5	Qualification conditions . . . . .	85
5.6	Approach using conjugate functions . . . . .	95
5.7	Characterizations via (exact-) subdifferentials . . . . .	99
<b>6</b>	<b>Sequential and exact formulae for the subdifferential of nonconvex integral functionals</b>	<b>104</b>
6.1	Sequential formulae for subdifferential calculus of nonconvex integrand functionals . . . . .	104
6.1.1	Subdifferential of $I_f$ by means of the chain rule . . . . .	104
6.1.2	Robusted local minima . . . . .	106
6.1.3	$\beta$ -smooth and proximal subdifferentials . . . . .	111
6.2	Limiting/Mordukhovich, G- and Clarke-Rockafellar subdifferentials . . . . .	119
<b>7</b>	<b>Subdifferential characterization of probability functions under Gaussian distribution</b>	<b>126</b>
7.1	Introduction . . . . .	126
7.2	Spheric-radial decomposition of Gaussian random vectors . . . . .	128
7.3	Continuity properties . . . . .	130
7.4	Subdifferential of the radial probability function . . . . .	132
7.5	Subdifferential of the Gaussian probability function $\varphi$ . . . . .	137
7.5.1	Main Result . . . . .	138
7.5.2	Two illustrating examples . . . . .	140
7.5.3	Lipschitz continuity and differentiability of $\varphi$ . . . . .	142
7.5.4	Application to a finite system of smooth inequalities . . . . .	142
7.6	Appendix . . . . .	146
7.6.1	Example 7.15 . . . . .	146
7.6.2	Example 7.16 . . . . .	148
	<b>Conclusions</b>	<b>150</b>
	<b>References</b>	<b>152</b>
	<b>Index of Notation</b>	<b>162</b>
	<b>Index of Topics</b>	<b>163</b>
