Contents

Introduction and Motivation **1**

1 Objectives and Scope **4**
1.1 General Objective 4
1.2 Specific Objectives 4
1.3 Scope 4

2 Theoretical Background **5**
2.1 Finite Element Method (FEM) 5
2.2 IsoGeometric Analysis (IGA) 6
2.2.1 B-Splines 7
2.2.2 NURBS (Non-Uniform Rational B-Splines) 10
2.2.3 Refinement 11
2.3 Geometry Independent Field approximaTion (GIFT) 13
2.3.1 Formulation of GIFT 14
2.4 Kirchhoff-Love Plate Theory (KLPT) 16
2.4.1 The Bending Problem of the KLPT 19
2.4.2 The Vibration Problem of the KLPT 19
2.4.3 Weak Form of the Kirchhoff-Love Plate Theory 20
2.4.4 Numerical Analysis of Free Vibrations 22

3 Methodology **24**
3.1 Resources 25

4 Definition of the Problems **26**
4.1 Problem 1: Clamped Circular Plate with One-Patch Parameterization 27
4.1.1 Geometry 27
4.1.2 Analytical Solution for Symmetric Bending 28
4.1.3 Analytical Solution for Free Vibrations 29
4.2 Problem 2: Clamped Circular Plate with Two-Patch Parameterization 33
4.2.1 Geometry 33
4.3 Problem 3: Clamped Square Plate with a cut-out of Complicated Shape, composed by 8 Patches 37
4.3.1 Geometry 37

5 Results **40**
5.1 Problem 1: Clamped Circular Plate with One-Patch Parameterization. . . . 40

5.1.1 Solution Bases . . . 40
5.1.2 Bending Symmetric Problem . . . 41
5.1.3 Free Vibrations Problem . . . 44
5.2 Problem 2: Clamped Circular Plate with Two-Patch Parameterization. . . . 48
5.2.1 Solution Bases for Regular Division . . . 48
5.2.2 Bending Symmetric Problem for a Regular Division . . . 49
5.2.3 Solution Bases for Irregular Divisions . . . 51
5.2.4 Bending Symmetric for Irregular Divisions . . . 52
5.3 Problem 3: Clamped Square Plate with a cut-out of Complicated Shape, composed by 8 Patches . . . 54
5.3.1 Solution Bases . . . 54
5.3.2 Bending Problem . . . 55
5.3.3 Free Vibrations Problem . . . 56

6 Analysis and Discussion **60**
6.1 Problem 1: Clamped Circular Plate with 1 Patch . . . 60
6.2 Problem 2: Clamped Circular Plate with 2 Patches . . . 61
6.3 Problem 3: Clamped Square Plate with a cut-out of Complicated Shape, composed by 8 Patches . . . 62
6.4 Discussion . . . 63

Conclusions **64**

Bibliography **65**
