

A new diterpenoide from mulinum crassifolium

Loyola, Luis

Borquez, Jorge

Morales, Glauco

San-Martin, Aurelio

From *Mulinum crassifolium* Phil, collected on the western flank in northern Chile, was isolated mulin-11,13-dien-20-oic acid and a new diterpenoid, 17-acetoxymulin-11,13-dien-20-oic acid 2. Its structure was established by spectral data, in particular the 2D NMR (DQF-COSY, DEPT, HMQC and HMBC).
