

## Diterpenes from *Nardophyllum lanatum*

Zdero, C.

Bohlmann, F.

Niemeyer, H. M.

The aerial parts of *Nardophyllum lanatum*, collected in northern Chile, gave in addition to a seco-diterpene isolated from an Argentinian collection two new cis-clerodanes and an acid derived from geranyl geraniol. The structures were elucidated by high field NMR techniques and by partial synthesis. © 1990.
