

Diet of *Cypraea caputdraconis* (Mollusca: Gastropoda) as it relates to food availability in Easter Island

Osorio,

Jara,

Ramirez,

Easter Island's endemic cowrie, *Cypraea caputdraconis* is primarily an herbivore. Algae composed >90% of the diet. *Cladophora*, *Sphacelaria*, *Ceramium*, *Galaxura* and *Pterocladia* were the most frequent and abundant items in the diet. -from Authors
