

Thermodynamics of the systems n-hexane/3-pentanone, n-hexane/acetone and n-heptane/3-pentanone mixtures

Barraza,

Díaz,

Edwards,

Tapia,

The vapor pressures of the systems n-Hexane/3-Pentanone, n-Hexane/Acetone and n-Heptane/3-Pentanone were measured at several temperatures with a circulation apparatus. From these data the thermodynamic functions which characterize the mixtures were calculated. © 1979, Akademische Verlagsgesellschaft.
