

Tropane alkaloids from *Schizanthus porrigens*

Muñoz, O.

Cortés, S.

Two new tropane alkaloids schizanthine Y and schizanthine Z have been isolated from the methanol extract of the leaves of *Schizanthus porrigens*, in addition to the known compounds (-)-6'-angeloyloxytropan-3'-ol and (-)-3'-seneciolyoxytropan-6'-ol. Structures for the new compounds are proposed on the basis of spectroscopic evidence.
