

Age of menarche and genetic blood markers Edad de menarquia y algunos marcadores geneticos sanguineos.

Valenzuela,

Avendaño,

Huerta,

Wells,

Gana,

In 160 girls from low and middle socio-economic class of Santiago we correlated the age at menarque with genetic markers such as ABO blood group, Rh, MN, Xg, haptoglobins, Esterase D and Phosphoglucomutase. No significant association of these markers and age at menarque was found.
