

Timing of the IUD insertion

Edelman, David A.

Zipper, Jaime

Rivera, Mirtha

Medel, Mario

The relationship between the time in the menstrual cycle when a TCu-200 or Cu-7-200 is inserted and subsequent IUD-related events was evaluated. For women who had either TCus or Cu-7s inserted, the pregnancy, expulsion and medical removal rates were similar for insertions performed at any time of the menstrual cycle. © 1979.
