

Quinacrine hydrochloride pellets: Preliminary data on a nonsurgical method of female sterilization

Zipper, J.

Cole, L. P.

Goldsmith, A.

Wheeler, R.

Rivera, M.

The efficacy of transcervical insertions of quinacrine hydrochloride pellets to produce tubal occlusion has been evaluated in a study of 139 women in Santiago, Chile. At one year, the pregnancy rate was 3.1%, an acceptable rate for a nonsurgical method of female sterilization.
