

Contents

Introduction	1
0.1 Graph cycles	2
0.2 Hypergraph cycles	3
0.2.1 Partitions into t -tight Berge cycles	4
0.2.2 Partitions into ℓ -cycles	5
1 Partitioning countably infinite complete hypergraphs into few Berge cycles	8
1.1 Introduction	8
1.2 The constructions	9
1.3 The upper bound	10
2 Partitioning 2-edge-coloured complete k-uniform hypergraphs into monochromatic ℓ-cycles	12
2.1 Introduction	12
2.2 Partition into a path and a cycle	13
2.3 Proof of Theorem 2.1.1 (a)	15
2.4 Proof of Theorem 2.1.1 (b)	18
3 Almost partitioning 2-edge-coloured complete 3-uniform hypergraphs into two monochromatic tight-cycles	21
3.1 Introduction	21
3.2 Monochromatic connected matchings	22
3.3 Hypergraph regularity	25
3.4 Proof of Theorem 3.1.1	27
4 Partitioning k-uniform hypergraphs into few monochromatic tight-cycles	29
4.1 Introduction	29
4.2 Notation	30
4.3 The proof	31
4.3.1 Finding short paths	31
4.3.2 Absorption Method	34
4.3.3 Absorption Lemma	35
4.3.4 Proof of Theorem 4.1.3	37
Bibliography	39
