

# Table of Contents

<b>Introduction</b>	<b>1</b>
<b>1 School Assignment by the Deferred Acceptance Algorithm</b>	<b>3</b>
1.1 Historic Context . . . . .	3
1.2 Properties of the Assignment Algorithm . . . . .	4
1.3 Implementation of the Matching Mechanism . . . . .	7
1.4 Results from the 2017 Process . . . . .	9
<b>2 Models for Estimating Preferences in the School Admissions Process</b>	<b>11</b>
2.1 Why Use a Bayesian Approach? . . . . .	11
2.2 Multivariate Probit . . . . .	12
2.3 Multivariate Ordered Probit . . . . .	14
<b>3 Data and Preference Model</b>	<b>17</b>
3.1 Schools . . . . .	18
3.2 Students . . . . .	25
3.3 Preferences . . . . .	27
3.4 Specification of the Model . . . . .	27
<b>4 Clustering of Choice Sets and Estimating Preferences</b>	<b>31</b>
4.1 Clustering of the Choice Sets . . . . .	31
4.2 Evaluation Metrics . . . . .	32
4.3 Instances for the Limarí Province . . . . .	34
4.3.1 Communes . . . . .	34
4.3.2 Clustering by Applications Centroids . . . . .	36
4.4 Results for the Limarí Province . . . . .	38
4.5 A Note on the Specification . . . . .	44
4.5.1 Multinomial Probit . . . . .	44
4.5.2 Fixed Effects and School Covariates Specification . . . . .	45
<b>5 Results for the Coquimbo Region</b>	<b>47</b>
5.1 Results for the Choapa Province . . . . .	47
5.2 Results for the Elqui Province . . . . .	49
5.3 How Do Families Value Schools? . . . . .	51
<b>6 How Does a Pricing Policy Affect Social Welfare?</b>	<b>57</b>
6.1 Pricing Policy in the School System Reform . . . . .	57

6.2 Measuring the Impact of a No-Price Policy in Public Schools . . . . .	58
<b>Bibliography</b>	<b>65</b>
