

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	General background . . . . .	1
1.2	Objectives . . . . .	7
1.3	Thesis organization . . . . .	7
<b>2</b>	<b>Defining a sustainability measure for EIPs</b>	<b>8</b>
2.1	Chapter summary . . . . .	8
2.2	Background: Assessing the sustainability of Eco-Industrial Parks . . . . .	9
2.3	Methods for Searching Indicators . . . . .	12
2.4	Results: indicators for Eco-industrial parks: selecting criteria, sustainability dimension, and classification . . . . .	13
2.4.1	Criteria for selecting indicators on EIPs . . . . .	13
2.4.2	Classification of EIP indicators . . . . .	16
2.5	Discussion . . . . .	18
2.5.1	Applying the criteria for indicators choice over 249 indicators . . . . .	19
2.5.2	Applying the criteria for indicators choice to an EIP in Kalundborg: hypothetical case . . . . .	21
2.5.3	Sustainability dimensions . . . . .	23
2.5.4	Final considerations . . . . .	25
2.6	Chapter conclusions . . . . .	26
<b>3</b>	<b>Resilience in industrial networks: defining a resilience indicator</b>	<b>28</b>
3.1	Chapter summary . . . . .	28
3.2	Background: security issues in Eco-Industrial Parks . . . . .	29
3.3	Definition of the Resilience Indicator . . . . .	31
3.3.1	Mathematical representation of an EIP . . . . .	33
3.3.2	Network Connectivity Index . . . . .	35
3.3.3	Flows Adaptability Index ( $\phi$ ) . . . . .	38
3.3.4	Resilience Indicator . . . . .	44
3.4	Application of the Resilience Indicator over case studies . . . . .	44
3.4.1	Small illustrative examples . . . . .	45
3.4.2	A real example: Ulsan, South Korea . . . . .	47
3.5	Discussion . . . . .	51
3.6	Chapter conclusions . . . . .	54
<b>4</b>	<b>Optimization model: designing a sustainable and resilient EIP</b>	<b>56</b>

4.1	Abstract . . . . .	56
4.2	Background: Optimizing Eco-Industrial Parks . . . . .	59
4.2.1	Multi-objective optimization . . . . .	63
4.3	Problem definition . . . . .	67
4.3.1	Ulsan EIP, South Korea . . . . .	67
4.3.2	General assumptions . . . . .	68
4.3.3	Superstructure formulation . . . . .	69
4.3.4	Selection of objective functions . . . . .	70
4.3.5	Modelling variables and equations . . . . .	72
4.3.6	General Model and data selection . . . . .	80
4.4	Results and discussion . . . . .	81
4.4.1	Comparison of the resulting configurations . . . . .	84
4.4.2	Selection of the optimal configuration . . . . .	91
4.4.3	Model considerations . . . . .	93
4.5	Chapter conclusions . . . . .	96
<b>5</b>	<b>Concluding remarks</b>	<b>98</b>
	<b>Bibliography</b>	<b>111</b>
	<b>Appendices</b>	<b>112</b>
<b>A</b>	<b>Appendix</b>	<b>113</b>
A.1	Indicators . . . . .	113
A.2	Investment parameter calculation . . . . .	126
A.3	Pumping drop estimation . . . . .	128
A.4	Resulting publications of this work . . . . .	129
