

Table of Contents

1	Introduction	1
1.1	Travertines	2
	Stable carbon isotope ratios in carbonates	3
1.2	Groundwater mixing processes	4
1.2.1	Meteoric and hydrothermal contribution	4
1.2.2	Marine contribution	6
1.3	Geologic background	8
1.4	Objectives of the study	10
2	Methods	11
2.1	Sampling and analytical procedures	11
2.1.1	Water samples	11
2.1.2	Carbonate samples	12
2.1.3	Gas samples	14
2.1.4	Microbiologic samples	15
2.2	Analytical and geochemical tools	17
2.3	Calculation of carbon and oxygen isotope ratios	17
2.4	Estimation of the carbon isotope ratio of CO ₂ gas from travertine data	19
3	Results	20
3.1	Water	20
3.1.1	Speciation calculation	22
3.1.2	Major and trace elements analysis	23
3.1.3	Stable isotopes	32
3.2	Travertine	34
3.2.1	Mineralogy	37
3.2.2	Calcite deposits	38
3.2.3	Aragonite and mixed deposits	46
3.2.4	Stable isotopes	61

3.3	Gas.....	64
3.4	Microbiology.....	66
4	Discussion.....	72
4.1	Bicarbonate sources.....	72
4.1.1	Chlorides source.....	72
4.1.2	Depth of the sources.....	77
4.2	External coverage travertine pinnacles.....	80
5	Conclusions.....	83
6	Bibliography.....	86
7	Appendix.....	97
