List of Tables ix

List of Figures x

1 Introduction 1
- 1.1 Red Dwarfs - The Lowest Mass of Main-Sequence Stars . . . 1
  - 1.1.1 Characteristics of Red Dwarfs . . . 1
  - 1.1.2 Broader Perspective . . . 3
- 1.2 Brown Dwarfs - The Bridge between Stars and Planets . . . 4
- 1.3 Methods of Detecting Binary Stars and Exoplanets . . . 8
  - 1.3.1 Visual Binaries . . . 9
  - 1.3.2 Spectroscopic Binaries . . . 10
  - 1.3.3 Perspective on Binary Stars . . . 11
- 1.4 Extrasolar Planets . . . 12
  - 1.4.1 Radial Velocities . . . 13
  - 1.4.2 Direct Imaging . . . 14
  - 1.4.3 Combining Radial Velocities and Direct Imaging . . . 15
- 1.5 Technique of Direct Imaging with AO Systems or High Contrast Imaging of Exoplanets . . . 16
  - 1.5.1 AO System . . . 16
  - 1.5.2 Differential Imaging and Post Processing Techniques . . . 20
- 1.6 Thesis Outline . . . 22

2 SAFARI I: A SPHERE discovery of a super metal-rich M dwarf companion to the star HD 86006 24
- 2.1 Introduction . . . 25
- 2.2 Target Selection, Observations and Reduction . . . 27
  - 2.2.1 Radial Velocity Observations . . . 28
  - 2.2.2 Direct Imaging Observations . . . 32
  - 2.2.3 Spectroscopic Reduction . . . 37
  - 2.2.4 HST Astrometric Calibration . . . 38
- 2.3 Results . . . 38
  - 2.3.1 HD86006 Companion Detection . . . 38
  - 2.3.2 Spectral Indices . . . 40
  - 2.3.3 Model Comparison . . . 41

2.3.4 Model Fitting . . . 47
2.3.5 HD 90520 . . . 50
2.4 Summary and Conclusions . . . 50

3 SAFARI II: A Pair of Ultracool Dwarf Companions to a Planet-Hosting Red Dwarf 55
3.1 Introduction . . . 55
3.1.1 Sub-stellar Objects . . . 55
3.1.2 Radial-velocity Measurements . . . 56
3.2 Observations and Reduction . . . 57
3.2.1 HARPS Radial Velocity Observations . . . 59
3.2.2 Direct Imaging and Spectroscopic Observations . . . 61
3.2.3 SPHERE Observation . . . 62
3.2.4 SINFONI Observation . . . 62
3.3 Results . . . 64
3.3.1 Detection of Companions to GJ 3634 . . . 64
3.3.2 Spectral Template and Model Comparison . . . 66
3.3.3 Spectral Index . . . 66
3.3.4 Isochrone Fitting . . . 74
3.3.5 Orbital Fitting . . . 76
3.4 Summary and Conclusions . . . 78

4 Achieving High Contrast with rapid Reference Star Differential Imaging on SPHERE at 1.6 μm 81
4.1 Introduction . . . 81
4.2 Observation and Reduction . . . 83
4.2.1 ADI Reduction . . . 85
4.2.2 RDI Reduction . . . 86
4.2.3 Contrast Curve Generation . . . 86
4.3 Results . . . 86
4.3.1 Tests to Compare RDI and ADI . . . 87
4.3.2 Full Data Set . . . 87
4.3.3 Cut Frame Set . . . 88
4.3.4 Position Dependece on SNR . . . 96
4.3.5 Quality of Retrieved FCs . . . 99
4.4 Discussion . . . 103
4.5 Conclusions . . . 105

5 Conclusions and Future Work 106

Bibliography 110
