2.1	Concepts	5
2.1.1	Mining concepts	5
2.1.2	Usability concepts	8
2.2	Related Work	9
2.2.1	Geometric libraries	9
2.2.2	Visualization applications	10
2.2.3	Visualization libraries	10
2.3	Evaluation methodologies	12
2.4	Software methodologies	13
2.4.1	Architecture patterns	13
2.4.2	Design patterns	13
3	Analysis and Design	16
3.1	Requirements	16
3.1.1	User requirements	16
3.1.2	Researcher requirements	17
3.1.3	Developer requirements	17
3.2	Software architecture	18
3.3	Data structure design	19
3.3.1	Element	19
3.3.2	Drawable	20
3.4	Rendering strategies	20
3.4.1	Blocks	20
3.4.2	Meshes	25

3.4.3	Points	28
3.4.4	Lines and Tubes	28
3.5	Raycasting	29
3.6	Projections	30
3.7	Element operations	32
3.7.1	Mesh/Ray intersection	32
3.7.2	Block/Plane Intersection	35
3.7.3	Mesh slicing	37
3.7.4	Mesh distances	37
3.7.5	Mesh volume	37
3.8	Graphical User Interface (GUI)	38
3.8.1	Main Window	39
3.8.2	Action Collection	39
3.8.3	Toolbar	39
3.8.4	Tree Widget	39
4	Implementation	40
4.1	Development environment	40
4.2	Model (Backend library)	41
4.2.1	Element class	41
4.2.2	DFElement class	44
4.2.3	ElementCollection	45
4.2.4	Parsers	46
4.2.5	API	47
4.3	View (Frontend library)	51
4.3.1	GLDrawable class	51
4.3.2	OpenGL Shaders	52
4.3.3	OpenGL programs	60
4.3.4	GLCollection	67
4.3.5	IntegrableViewer	68
4.3.6	FPSCounter	68
4.3.7	API	69
4.4	Interaction modes	74
4.4.1	Normal mode	75
4.4.2	Slice mode	75
4.4.3	Detection mode	75
4.4.4	Measurement mode	75
4.5	Application (GUI)	76
4.5.1	Main window	76
4.5.2	Action collection	77
4.5.3	Toolbar	77
4.5.4	Element tree	78
4.5.5	Keybindings	78

4.5.6	Help/About	78
4.5.7	Camera Dialog	78
4.5.8	Color Dialog	79
4.5.9	Properties Dialog	79
4.6	Usage	81
4.6.1	As an application	81
4.6.2	As an integrable widget	81
4.6.3	As a script library	81
5	Benchmarks	84
5.1	Testing environment	84
5.2	Methodology	84
5.3	Internal benchmarks	85
5.3.1	Mesh coloring	85
5.3.2	Block rendering	88
5.4	Scalability on elements	88
5.5	Scalability on triangles	90
5.6	Usability benchmarks	93
5.6.1	Results	95
5.6.2	SUS Score calculation	95
5.7	Discussion	96
6	Conclusions	97
	Bibliography	102
	Appendices	103
A	Source code of benchmarks	104
A.1	Internal benchmarks: Attribute vs Uniform	104
A.2	Internal benchmarks: Geometry vs Instanced	105
A.3	Scalability on elements	106
A.4	Scalability on triangles	107
