

Contents

1	Introduction	1
1.1	Heisenberg Model	1
1.2	Holstein-Primakoff	2
1.3	Magnons in a One-dimensional Lattice	3
1.4	Magnons in Generalized Lattice	6
1.5	Diagonalization of a Quadratic Bosonic Hamiltonian	8
1.5.1	Bogoliubov Transformation	9
1.5.2	Colpa's Algorithm	10
2	Topological Magnons in CrI_3	12
2.1	Heisenberg-Kitaev Model	14
2.2	Bulk's dispersion relation	16
2.3	Nanoribbons	18
2.4	Time Reversal Symmetry	23
2.5	Chern Number	23
2.6	Thermal Hall Effect	25
2.7	Conclusion	26
3	Magnon Polarons in a Magnetic Field Gradient	28
3.1	Phonons in a Lattice	28
3.2	Equilibrium in a Space-Varying Magnetic Field	35
3.3	Magnon-Phonon Coupling	37
3.4	Conclusion	42
4	Conclusion	43
	Bibliography	44
