Introduction	1
1 On the observability of the arrival time of consumers in a dynamic pricing problem	5
1.1 Introduction	5
1.2 Contributions	8
1.3 Related literature	9
1.4 Model description	12
1.4.1 The buyer’s problem.	13
1.4.2 The seller’s problem	14
1.5 Analysis of the model with an observable arrival	16
1.5.1 Uniform valuation case	19
1.6 Analysis of the model with unobservable arrival	22
1.6.1 Monotone hazard rate valuation distribution	22
1.6.2 A feasible periodic price function	23
1.6.3 Revenue analysis	25
1.7 Bounding the value of observability	25
1.7.1 An upper bound for the value of observability	25
1.7.2 A lower bound for the value of observability	26
2 Connection between posted price mechanisms and prophet inequalities	29
2.1 Introduction	29
2.2 Contributions	30
2.3 Related literature	32
2.4 Preliminaries	34
2.4.1 Myerson’s optimal mechanism	35
2.4.2 Posted-price mechanisms	35
2.4.3 About probability distributions and the virtual valuation	36
2.5 Reduction from prophets to pricing	36
2.6 Reduction from pricing to prophets	38
2.6.1 Reduction overview	38

2.6.2	Valuation Mapping Lemma	38
2.6.3	From posted prices to online selection	41
2.7	Implications of the reduction	42
2.7.1	Improved lower bounds for PPMs	43
2.7.2	Bounding the revenue of Myerson’s optimal mechanism	44
3	Dynamic optimization problems: a unifying approach	46
3.1	Introduction	46
3.2	Contributions	47
3.3	Related literature	48
3.4	Model	49
3.5	Certainty Equivalent Heuristic	50
3.6	Bound on the cumulative reward loss for DRCRC problems	52
3.7	Dual problem and sufficient conditions for Assumption 2	54
3.7.1	Continuum of actions	55
3.7.2	Finite set of actions	58
3.8	Notable applications with continuum of actions	60
3.8.1	Network Dynamic Pricing Problem	60
3.8.2	Dynamic Bidding in Repeated Auctions	63
3.9	Notable applications with finite set of actions	66
3.9.1	Network Revenue Management Problem	66
3.9.2	Choice-Based Network Revenue Management Problems	68
3.9.3	Stochastic Depletion Problems	70
3.9.4	Online Matching	71
3.9.5	Order Fulfillment Problem	72
3.9.6	Other applications	74
	Conclusion	75
	Bibliography	76
A	Appendix to Chapter 1	88
A.1	Technical results	88
A.2	Proofs for Section 1.5	90
A.2.1	Proof of Proposition 1	90
A.2.2	Proof of Theorem 1	92
A.2.3	Proof of Lemma 1	92
A.3	Proof for Section 1.6	93
A.3.1	Proof of Lemma 2	93
A.4	Proof for Section 1.7.1	94
A.4.1	Proof of Theorem 2	94
B	Appendix to Chapter 2	97

B.1	Proofs for Section 2.4	97
B.1.1	Proof of Proposition 2	97
B.1.2	Proof of Proposition 3	97
B.2	Proof for Section 2.5	98
B.2.1	Proof of Lemma 3	98
B.2.2	Proof of Theorem 4	98
B.3	Proofs for Section 2.6	100
B.3.1	Proof of Proposition 4	100
B.3.2	Proof of Proposition 5	100
B.3.3	Proof of Lemma 4	101
B.3.4	Proof of Theorem 5	101
C	Appendix to Chapter 3	104
C.1	Additional material	104
C.1.1	Static Probabilistic Control Heuristic	104
C.1.2	Finite set of actions	106
C.1.3	Dynamic bidding in repeated auctions	107
C.2	Proof Theorem 6	109
C.3	Proofs for Section 3.7	117
C.3.1	Proof of Proposition 7	117
C.3.2	Proof of Lemma 7	119
C.3.3	Proof of Lemma 8	123
C.3.4	Proof of Lemma 9	124
C.4	Proofs for Section 3.8	125
C.4.1	Proof of Proposition 9	125
C.5	Auxiliary Results	126
