<b>List of Tables</b>	<b>xii</b>
<b>List of Figures</b>	<b>xiv</b>
<b>List of Acronyms</b>	<b>xxiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Giant Molecular clouds . . . . .	1
1.2 Star formation . . . . .	2
1.2.1 High-mass star formation . . . . .	4
1.2.2 High-mass star formation theories . . . . .	5
1.2.3 Massive and dense clumps . . . . .	6
1.2.4 Properties of massive and dense clumps . . . . .	7
1.2.5 Fragmentation of clumps . . . . .	11
1.3 Clump physical parameters . . . . .	12
1.3.1 Dust emission, mass and column density . . . . .	12
1.3.2 Molecular line emission . . . . .	13
1.4 Outline of the thesis . . . . .	19
<b>2 Thesis objectives</b>	<b>20</b>
2.1 SuperMALT: physical and chemical properties of massive and dense clumps .	20
2.2 Artemis survey: fragmentation properties of massive dense clumps at 0.1 pc scale . . . . .	21
2.3 ALMA observations of two massive and dense clumps . . . . .	22
2.4 Data reduction tools and methods . . . . .	23
<b>3 SuperMALT: A survey of massive and dense clumps in high excitation molecular lines</b>	<b>24</b>
3.1 Introduction . . . . .	24
3.2 The survey . . . . .	26
3.2.1 Targets . . . . .	26
3.2.2 Molecular lines . . . . .	31
3.3 Observations and data reduction . . . . .	31
3.4 Results . . . . .	33
3.4.1 Line detection . . . . .	33
3.4.2 Spectra . . . . .	33
3.4.3 Velocities and line widths . . . . .	36

3.4.4	Morphologies . . . . .	41
3.4.5	Sizes . . . . .	41
3.5	Analysis and discussion . . . . .	45
3.5.1	Integrated line intensities . . . . .	45
3.5.2	Line ratios . . . . .	50
3.5.3	$\text{HCO}^+$ : Optical depths, excitation temperature and column densities	55
3.5.4	Clump physical parameters . . . . .	57
3.5.5	Line asymmetries . . . . .	59
3.5.6	‘Uncertain’ clumps . . . . .	64
3.6	summary . . . . .	64
3.7	Appendix . . . . .	66
3.7.1	Central spectra of $J = 3 \rightarrow 2$ . . . . .	66
3.7.2	Central spectra of $J = 4 \rightarrow 3$ . . . . .	74
3.7.3	Contour maps of $J = 3 \rightarrow 2$ . . . . .	76
3.7.4	Contour maps of $J = 4 \rightarrow 3$ . . . . .	100
3.7.5	$\text{HCO}^+$ and $\text{N}_2\text{H}^+$ $J = 3 \rightarrow 2$ sizes . . . . .	105
<b>4</b>	<b>Artemis survey: fragmentation of massive and dense clumps at the 0.1 pc scale</b>	<b>107</b>
4.1	Introduction . . . . .	107
4.2	The sample . . . . .	108
4.3	Observations . . . . .	108
4.4	Results . . . . .	110
4.4.1	Artemis 350 $\mu\text{m}$ emission . . . . .	110
4.4.2	Astrodendro: core identification . . . . .	118
4.5	Analysis and discussion . . . . .	122
4.5.1	Core parameters . . . . .	122
4.5.2	Mass distribution . . . . .	123
4.5.3	Fragmentation properties . . . . .	124
4.6	Summary . . . . .	128
<b>5</b>	<b>ALMA study of two massive and dense clumps</b>	<b>130</b>
5.1	Introduction . . . . .	130
5.2	The targets . . . . .	131
5.3	Observations . . . . .	134
5.4	Results . . . . .	136
5.4.1	Continuum emission . . . . .	136
5.4.2	Molecular line emission . . . . .	138
5.4.3	Line emission from cores . . . . .	146
5.5	Analysis and discussion . . . . .	150
5.5.1	Core parameters . . . . .	151
5.5.2	Mass distribution . . . . .	158
5.5.3	Dynamical state . . . . .	160
5.5.4	The massive core at the center of the protostellar clump . . . . .	161
5.5.5	Comparison with models of the fragmentation of clumps and the formation of high-mass stars . . . . .	164
5.6	Summary . . . . .	165

<b>6 Summary</b>	<b>168</b>
6.0.1 SuperMALT: physical and chemical properties of massive and dense clumps . . . . .	168
6.0.2 Fragmentation properties of MDCs at 0.1 pc scale . . . . .	169
6.0.3 ALMA observations of two MDCs at the 0.02 pc scale . . . . .	170
6.0.4 Conclusions . . . . .	171
<b>Bibliography</b>	<b>174</b>
