Contents

1. Introduction **1**
1.1. Isogeometric Analysis: Galerkin (IGAFEM) and Collocation (IGA-C) 2
1.2. Partition of Unity and Generalized methods 3
1.3. Contribution 5
1.3.1. Outline of the paper 5

2. Objectives **6**
2.1. General Objectives 6
2.1.1. Specific Objectives 6
2.2. Scope 6

3. Methodology **7**
3.1. Literature review 7
3.2. Eriched isogeometric collocation code 7
3.3. Collocation points distribution strategies 7
3.4. Aplications on wave propagation problems 8

4. Theoretical background **9**
4.1. Exterior time harmonic acoustic wave propagation 9
4.2. Isogeometric Collocation 10
4.2.1. Non-Uniform Rotational B-Splines (NURBS) 10
4.2.2. Collocation Method 14
4.2.3. Collocation points and superconvergent points 15
4.3. Enriched Isogeometric Collocation for the Helmholtz Equation 17
4.3.1. Plane-Wave (PW-) enrichment 18
4.3.2. Generalized Harmonic Polynomial (GHP-) enrichment 18
4.3.3. Collocation points scheme 19
4.3.4. Enriched IGA-C on multi-patch boundary problems 19
4.3.5. Linear system solvers 19

5. Numerical Results **21**
5.1. One-dimensional scattering 21
5.2. Plane-wave scattered in a square domain 24
5.3. The duct problem 27
5.4. Spinning wave propagation 52
5.5. Plane wave scattered by cylinder 58

5.6. Star geometry 62

6. Conclusion **64**

Bibliography **64**

Appendix **73**

Appendix A. Geometry Parameterization employed in the Numerical Examples **73**
