Abstract	ii
List of Tables	x
List of Figures	xi
1 Background and Motivation	1
1.1 Introduction	1
1.2 Operation of an OMT	2
1.3 Designs of OMTs	4
1.4 Heterodyne Mixers Suitable for this Work	6
1.5 General Problem	7
1.6 Objectives	8
1.6.1 General Objective	8
1.6.2 Specific Objectives	8
1.7 Hypothesis	8
1.8 Thesis Outline	9
2 Literature Review	11
2.1 Scattering Matrix	11
2.2 Electromagnetic Waves	12
2.3 Polarization of a wave	13
2.3.1 Polarization Ellipse	14
2.4 Orthomode Transducer	16
2.5 Electromagnetic Propagation in Waveguides	17
2.5.1 Rectangular Waveguides	19
2.5.2 Circular Waveguides	19
2.6 Microstrip Lines	20
2.6.1 Characteristic Impedance of the Microstrip Line	20
2.6.2 Attenuation in Microstrip Lines	21
2.7 Wide Bandwidth Antennas	23
2.7.1 Resonant antennas: an overview	23
2.7.2 Resonance overlapping type of antennas	24
2.7.3 Travelling Wave Antennas	24
2.7.4 "Fat" monopoles	26
2.7.5 Mixed antennas	26

2.7.6	One further technique: slits for bandwidth enhancement	27
2.8	Metamaterials	28
2.9	Summary	30
3	Methodology	31
3.1	Design and Simulation	31
3.2	Analysis of Results	34
3.3	Comparison of results	34
3.4	Summary	35
4	Planar Version of OMT and Front End	37
4.1	PV OMT	37
4.1.1	PV OMT Design	37
4.1.2	PV OMT simulation results	40
4.2	PV LO Splitter	42
4.3	PV Front End	44
4.4	Mechanical design	47
4.5	Discussion	47
4.6	Summary and Conclusions	47
5	Semi-Turnstile Version of OMT and Front End	49
5.1	STV OMT	49
5.1.1	OMT Design	49
5.1.2	STV OMT simulation results	50
5.2	STV LO Splitter	51
5.3	STV Front End	55
5.4	Mechanical Design	55
5.5	Discussion	58
5.6	Summary and Conclusions	58
6	Analysis of Results	59
6.1	Cross-polarization analysis	59
6.1.1	Comparison between OMTs	59
6.1.2	Cross-polarization tolerance to load mismatches and imbalances	60
6.2	Isolation analysis	63
6.3	Fabrication tolerance analysis	65
6.3.1	Tolerance analysis: PV OMT	67
6.3.2	Tolerance analysis: PV LO Splitter	69
6.3.3	Tolerance analysis: STV OMT	69
6.3.4	Tolerance analysis: STV LO Splitter	71
6.4	Current distribution on probes	72
6.4.1	What types of antennas are the designed microstrip probes	72
6.4.2	Study of the influence of slits	73
6.5	Summary	76
7	Comparison of Results	77
7.1	Electromagnetic performance comparison	77
7.1.1	Comparison of OMTs	77

7.1.2	Comparison of LO splitters	78
7.2	Fabrication comparison	78
7.2.1	OMT fabrication	78
7.2.2	Front end fabrication	80
7.3	The verdict	83
7.4	Conclusions	83
	Conclusion	85
	Bibliography	86
	Appendices	91
	Appendix A Results for cross-polarization tests: imperfect matching at the output ports of the PV OMT	92
	Appendix B Results for cross-polarization tests: imperfect matching at the output ports of the STV OMT	97
	Appendix C Response of reflection losses to manufacturing errors: Planar Version OMT	102
	Appendix D Response of reflection losses to manufacturing errors: Planar Version LO Splitter	107
	Appendix E Response of reflection losses to manufacturing errors: Semi Turnstile Version OMT	111
	Appendix F Response of reflection losses to manufacturing errors: Semi Turnstile Version LO Splitter	116
	Appendix G Figures of current distribution on microstrip probes	121
