

# Contents

<b>Introduction</b>	<b>1</b>
<b>I Topological protection of squeezed light</b>	<b>3</b>
<b>1 Topological band theory</b>	<b>5</b>
1.1 The integer quantum Hall effect . . . . .	5
1.2 The SSH system . . . . .	8
1.2.1 The role of symmetries . . . . .	12
1.2.2 Edge States and robustness against disorder . . . . .	14
1.3 Topological photonics . . . . .	17
1.3.1 The electromagnetic eigenvalue problem and the paraxial wave equation . . . . .	18
1.3.2 Topological photonics . . . . .	20
<b>2 Quantum optics</b>	<b>23</b>
2.1 Quantization of the electromagnetic field . . . . .	23
2.1.1 Phase space representation: The Wigner function . . . . .	26
2.2 Gaussian states . . . . .	27
2.2.1 Some examples of Gaussian states . . . . .	28
2.2.2 A numerical method for the evolution of Gaussian states . . . . .	29
2.2.3 Entanglement criterion for continuous variable systems . . . . .	30
2.3 Squeezed states . . . . .	31
2.3.1 Single-mode squeezing . . . . .	31
2.3.2 Two-mode squeezing . . . . .	33
<b>3 Quadrature protection of squeezed states in a one-dimensional photonic topological insulator</b>	<b>36</b>
3.1 Introduction . . . . .	36
3.2 The lattices . . . . .	37
3.3 Single-mode squeezing in a topological state . . . . .	39
3.3.1 Squeezing the eigenstate . . . . .	40
3.3.2 Propagation of single-mode squeezing . . . . .	40
3.4 Two-mode squeezing of topological states . . . . .	44
3.5 Quantum teleportation employing a topological lattice . . . . .	44
3.6 Final remarks of chapter 3 . . . . .	48

<b>II Interaction between electrons and chiral phonons in two-dimensional materials</b>	<b>49</b>
<b>4 Copropagating edge states produced by the interaction between electrons and chiral phonons in two-dimensional materials</b>	<b>51</b>
4.1 Introduction . . . . .	51
4.2 Hamiltonian model . . . . .	52
4.3 Band structure: Gaps and edge states . . . . .	54
4.4 Quantum transport fingerprints of copropagating electron-phonon states . . . . .	56
4.5 Final remarks of chapter 4 . . . . .	58
<b>Conclusions</b>	<b>59</b>
<b>Bibliography</b>	<b>61</b>
<b>Appendixes</b>	<b>76</b>
A Extended results of section 3.3.2 . . . . .	76
B On the statistical fluctuations for Fig. 3.4 and 3.5 . . . . .	79
C The hamiltonian model of section 4.2: Detailed calculation, zone-folding scheme and low energy approximation . . . . .	80
D Discussion on the possible topological origin of the edge states of section 4.3: The Berry phase at the pseudogap . . . . .	82
E Extended results of section 4.3: Klein and armchair ribbons . . . . .	83
