

# Contents

<b>1. Introduction</b>	<b>1</b>
1.1. Motivation . . . . .	1
1.1.1. The Standard Cubesat and Its Exponential Growth . . . . .	1
1.1.2. Cubesat-Moon Projects . . . . .	2
1.1.3. The Planar and Circular Restricted Three Body Problem . . . . .	3
1.2. Hypothesis . . . . .	3
1.3. General Objective . . . . .	3
1.4. Specific Objectives . . . . .	3
1.5. Thesis Structure . . . . .	4
<b>2. Theoretical Framework</b>	<b>5</b>
2.1. Equations of Motion . . . . .	5
2.1.1. Frames of Reference . . . . .	6
2.1.2. Jacobi Constant $C$ . . . . .	7
2.1.3. Euler-Lagrange Points . . . . .	7
2.2. Perturbations . . . . .	9
2.2.1. Atmospheric Drag . . . . .	9
2.2.2. Oblate Earth: J2 factor . . . . .	10
2.2.3. Sun Gravity . . . . .	11
<b>3. Electrical Propulsion: The Nano Pulsed Plasma Thruster</b>	<b>13</b>
3.1. Space propulsion . . . . .	13
3.1.1. Thruster: Categories and Examples . . . . .	14
3.2. Plasma Focus and its Miniaturization . . . . .	14
3.2.1. The Nano Pulsed Plasma Thruster nPPT . . . . .	15
3.3. Pulsed Plasma Thruster PPT . . . . .	15
3.4. The Thruster Model . . . . .	16
<b>4. Results</b>	<b>21</b>
4.1. Circular Orbits . . . . .	21
4.2. Comparison Among Perturbations . . . . .	28
4.3. Transfer Orbits . . . . .	33
4.4. Stationary Orbits . . . . .	46
4.5. Landing Orbits . . . . .	51
4.6. Geostationary Initial Orbit . . . . .	55
4.7. A 10% Reduction of $\Delta m$ and $c$ . . . . .	59
4.7.1. A 10% Reduction of $\Delta m$ . . . . .	59
4.7.2. A 10% Reduction of $c$ . . . . .	60

4.7.3. Simultaneous Reduction of a 10% in $\Delta m$ and $c$ . . . . .	62
<b>5. Conclusions</b>	<b>65</b>
<b>Bibliography</b>	<b>67</b>
<b>Anexo A. Miscellaneous Content</b>	<b>72</b>
<b>Anexo B. Derivation of <math>\mu</math> factor</b>	<b>73</b>
<b>Anexo C. Derivation of the Equations of Motion</b>	<b>75</b>
<b>Anexo D. Frames of Reference and Initial Conditions</b>	<b>77</b>
<b>Anexo E. Jacobi Constant <math>C</math> Derivation</b>	<b>80</b>
<b>Anexo F. Gravity-gradient Stabilization for a Cubesat of Six Units</b>	<b>81</b>
<b>Anexo G. Derivation of Factor Associated to <math>J_2</math></b>	<b>83</b>
<b>Anexo H. Zeng's Method to Compute <math>\Delta m</math></b>	<b>85</b>
<b>Anexo I. Additional Results of Section 4.7</b>	<b>86</b>
<b>Anexo J. The Fourth Order Runge-Kutta Method</b>	<b>91</b>
<b>Anexo K. Code</b>	<b>92</b>
