

# Table of Content

<b>1. Introduction</b>	<b>1</b>
1.1. Motivation . . . . .	1
1.1.1. Enerdis . . . . .	2
1.2. Hypothesis Statement . . . . .	3
1.3. Objectives . . . . .	3
1.3.1. General Objective . . . . .	3
1.3.2. Specific Objectives . . . . .	3
1.4. Scope . . . . .	3
<b>2. Background</b>	<b>5</b>
2.1. Smart Grids . . . . .	5
2.2. Electricity Demand . . . . .	8
2.2.1. Electricity Demand as a Control Variable . . . . .	8
2.2.2. Elasticity of demand . . . . .	9
2.3. Demand Side Management and Demand Response . . . . .	10
2.3.1. Enabling Technologies . . . . .	13
2.3.1.1. Smart Meters . . . . .	14
2.3.1.2. Smart Plug, Smart Thermostat and Smart Appliances . . . . .	14
2.3.1.3. Internet of Things and Cloud Services . . . . .	15
2.3.1.4. LAN/HAN/WAN . . . . .	15
2.3.1.5. Advanced Metering Infrastructure (AMI) . . . . .	15
2.3.1.6. Wide Area Monitoring System (WAMS) . . . . .	15
2.3.2. Communication Protocols and Standards . . . . .	16
2.3.2.1. IEEE 2030.5 . . . . .	16
2.3.2.2. OpenADR . . . . .	16
2.3.3. What can be done with the DSM? . . . . .	20
2.3.4. Enerdis DR Scheme . . . . .	20
2.4. Type of Loads . . . . .	22
2.5. Economic Dispatch . . . . .	22
2.5.1. Unit Commitment . . . . .	22
2.5.2. Dispatch . . . . .	23
2.5.3. Enerdis Scheme . . . . .	24
2.6. Value of Lost Load . . . . .	24
2.7. Distributed Energy Resources . . . . .	25
2.8. Net metering . . . . .	25
2.9. Discussion . . . . .	26
2.9.1. Why is non-compliance worth studying? . . . . .	26

2.9.2.	Why would the demand management not be fulfilled? . . . . .	27
<b>3.</b>	<b>Methodology</b>	<b>28</b>
3.1.	Description of demand management model . . . . .	28
3.1.1.	Objective function and constraints . . . . .	30
3.1.1.1.	Non-Interruptible Appliances Restrictions . . . . .	31
3.1.1.2.	Interruptible Appliances Restrictions . . . . .	32
3.1.1.3.	Thermostatically Controlled Appliances Restrictions . . . . .	33
3.1.1.4.	Energy Storage System Restrictions . . . . .	35
3.1.1.5.	Photovoltaic Panels Restrictions . . . . .	36
3.1.1.6.	Power Flow Between the User and the Grid Restrictions . . . . .	36
3.1.2.	Model output . . . . .	37
3.1.3.	Creation of grid users . . . . .	39
3.1.3.1.	Generation of appliances . . . . .	39
3.1.3.2.	User preferences . . . . .	41
3.1.3.3.	Distributed Energy Resources . . . . .	42
3.1.3.4.	User creation output . . . . .	42
3.2.	Description of the electric system model . . . . .	42
3.2.1.	Objective function and constraints . . . . .	43
3.2.1.1.	Generating unit restrictions . . . . .	43
3.2.1.2.	Power system restrictions . . . . .	43
3.2.1.3.	Operation of the system . . . . .	44
3.2.2.	Cost functions . . . . .	45
3.2.3.	Model Output . . . . .	45
3.3.	Non-compliance simulation . . . . .	46
3.4.	Combination of models . . . . .	46
3.5.	Computational Tools . . . . .	47
3.5.1.	FICO Xpress . . . . .	48
3.5.2.	Excel . . . . .	48
3.6.	Data Collection . . . . .	48
<b>4.</b>	<b>Case study</b>	<b>49</b>
4.1.	Four buses system . . . . .	49
4.1.1.	System description . . . . .	49
4.1.2.	Sensitivity analysis . . . . .	51
4.1.2.1.	50 % of manageable users . . . . .	53
4.1.2.2.	66 % of manageable users . . . . .	54
4.1.2.3.	83 % of manageable users . . . . .	55
4.1.2.4.	Energy supplied by emergency generators . . . . .	56
4.2.	24-buses system . . . . .	58
4.2.1.	System Description . . . . .	58
4.2.2.	Sensitivity analysis . . . . .	59
4.2.2.1.	Operating cost . . . . .	59
4.2.2.1.1.	Operating cost with fixed non-compliant users . . . . .	64
4.2.2.2.	Cost overrun . . . . .	66
4.2.2.3.	Energy supplied by emergency generators . . . . .	71
<b>5.</b>	<b>Analysis</b>	<b>77</b>

5.1. Application in other systems . . . . .	78
5.2. How to deal with non-compliance . . . . .	79
5.2.1. Different $\omega_2$ deviation bands . . . . .	81
5.3. Enerdis . . . . .	82
5.3.1. Deviations of $\omega_2$ . . . . .	83
<b>6. Conclusion</b>	<b>86</b>
6.1. Future Work . . . . .	87
<b>Bibliography</b>	<b>89</b>
<b>Annexes A. Results</b>	<b>94</b>
<b>Annexes B. Deviation on randomly created users</b>	<b>113</b>
<b>Annexes C. Renewable Generation and outdoor temperature</b>	<b>114</b>
