

Table of Content

1	Introduction	1
2	Background	5
2.1	Piezoelectric energy harvesters (PEHs)	5
2.1.1	PEH predictive model	5
2.2	Bayesian inference	6
2.2.1	Classical Bayesian scheme	6
2.2.2	Hierarchical Bayesian scheme	8
2.2.3	Model class selection	10
2.2.4	Prior and posterior predictive analyses	11
2.2.5	Transitional Markov chain Monte Carlo (TMCMC)	12
3	PEH’s uncertainties	14
3.1	Model parameters uncertainties and prior probability density function for PEHs	14
3.2	Experimental identification of multiple PEHs	14
4	Bayesian inference on PEHs	17
4.1	Model parameter updating	17
4.1.1	Classical Bayesian scheme	17
4.1.2	Hierarchical Bayesian scheme	22
4.1.3	Identification of individual PEHs with objective prior	27
4.2	Model class selection	28
5	Conclusions	31
	Bibliography	33
	Annexes	36
	Annex A	36
	Annex B	38
