# Table of Content

**1. Introduction** **1**
- 1.1. Objectives . . . 2
- 1.2. Motivation . . . 3
- 1.3. Scope of work . . . 3

**2. Background** **4**
- 2.1. FSW . . . 4
- 2.2. Background literature . . . 5
- 2.3. Coupled model for friction stir welding . . . 6
  - 2.3.1. List of symbols . . . 6
- 2.4. Scaling of the coupled thermal and mechanical problem . . . 8
  - 2.4.1. Heat conduction in the shear layer . . . 8
  - 2.4.2. Heat generation in the shear layer . . . 10
  - 2.4.3. Constitutive equation in the shear layer . . . 11
  - 2.4.4. Heat conduction outside the shear layer . . . 12
  - 2.4.5. Solutions of the system of scaled equations . . . 13
- 2.5. Material Properties . . . 14
  - 2.5.1. Thermal and Mechanical Properties . . . 14
  - 2.5.2. Zenner-Hollomon law constants . . . 15

**3. Materials and methods** **17**
- 3.1. Methodology . . . 17
- 3.2. Experiment selection . . . 18
  - 3.2.1. Data Base . . . 18
  - 3.2.2. Measurement Forms . . . 18
- 3.3. Resources . . . 19

**4. Adjustment of coupled model for FSW** **20**
- 4.1. Influence of the heat loss through the plate . . . 20
- 4.2. Modification of the coupled model for FSW . . . 21

**5. Results** **22**
- 5.1. Ratio of measurement and numerical results to estimations . . . 22
  - 5.1.1. Estimation of maximum temperature . . . 23
  - 5.1.2. Estimation of torque . . . 28
  - 5.1.3. Estimation of shear layer thickness . . . 33
  - 5.1.4. Correlation between the estimated and measured maximum temperature, torque and shear layer thickness . . . 38

5.1.5. Incorporation of the fifth assumption . . . . . 42
5.2. Error and Correction factors . . . . . 44

**6. Discussion** **45**

**7. Conclusions** **50**
7.1. Future work . . . . . 51

**Bibliography** **52**

**Annexed A. Measured of pin and shoulder for Colgrove Al7075** **56**

**Annexed B. Summary of data compiled from literature without accounting for surface heat losses** **57**

**Annexed C. Summary of data compiled from literature accounting for surface heat losses** **63**

**Annexed D. Summary of data compiled of $\theta$ and $\phi$.** **69**
