

# Table of Content

|   |           |
|---|-----------|
| <b>1. Introduction</b>  | <b>1</b>  |
| 1.1. Fundamentals of Radiative Transfer . . . . .               | 2         |
| 1.2. Physics of protoplanetary discs . . . . .                  | 4         |
| 1.2.1. Disc composition . . . . .                               | 4         |
| 1.2.2. Disc structure . . . . .                                 | 7         |
| 1.3. Radiative Transfer in discs . . . . .                      | 10        |
| 1.4. Simulating Radiative transfer with MCMC . . . . .          | 11        |
| 1.5. Observing dusty discs . . . . .                            | 13        |
| 1.5.1. Spectral Data . . . . .                                  | 14        |
| 1.5.2. Radio continuum and Infrared Polarised imaging . . . . . | 14        |
| 1.6. Summary: thesis outline . . . . .                          | 17        |
| <br>  |           |
| <b>2. V4046 Sgr: a disc with a thin ring</b>                    | <b>18</b> |
| 2.1. Abstract . . . . .   | 18        |
| 2.2. Introduction . . . . .                                     | 18        |
| 2.3. Observations . . . . .                                     | 19        |
| 2.3.1. ALMA . . . . .   | 19        |
| 2.3.2. VLT/SPHERE-IRDIS . . . . .                               | 22        |
| 2.3.3. Spectral energy distribution . . . . .                   | 24        |
| 2.4. Parametric radiative transfer model . . . . .              | 25        |
| 2.4.1. General setup . . . . .                                  | 25        |
| 2.4.2. Radial structure: gas & small dust grains . . . . .      | 26        |
| 2.4.3. Radial structure: large dust grains . . . . .            | 27        |
| 2.4.3.1. Reproducing the central emission . . . . .             | 28        |
| 2.4.4. Vertical structure . . . . .                             | 28        |
| 2.4.5. Image synthesis and SED computation . . . . .            | 30        |
| 2.5. Model results and discussion . . . . .                     | 30        |
| 2.6. Conclusions . . . . .                                      | 33        |
| <br>  |           |
| <b>3. ISO-Oph 2: a case study for external radiation?</b>       | <b>35</b> |
| 3.1. The system in question . . . . .                           | 35        |
| 3.2. Radiative transfer modelling . . . . .                     | 38        |
| 3.2.1. General setup . . . . .                                  | 38        |
| 3.2.2. Parameter space exploration . . . . .                    | 41        |
| 3.3. Early Discussion . . . . .                                 | 45        |
| 3.4. Conclusions and Future work . . . . .                      | 46        |
| <br>  |           |
| <b>4. Conclusions</b>   | <b>48</b> |

|  |           |
