

# Table of Content

1. Introduction .....	1
2. Mod- $\zeta$ (Var) Method for the MIMO 3D case.....	3
3. Description of Justicia Espada Acuña Mena (JEAM) building.....	7
4. Dynamic properties of the JEAM building from Operational Modal Analysis (OMA) 11	
5. Validation of Mod- $\zeta$ (var) Method from simulated data using a 3D linear model of the JEAM building .....	14
6. Time-Variant dynamic properties and Empirical Response Spectrum of the JEAM building during the 2010 Central chilean mega-earthquake (Mw=8.8). .....	17
7. Inter-story drifts and local responses of the JEAM building from actual seismic data..	27
8. Conclusions .....	31
9. Acknowledgment.....	33
10. Bibliography .....	33
