

Table of content

Introduction	1
1 Background	10
1.1 Background in topological and symbolic dynamics	10
1.1.1 Basics in topological dynamics	10
1.1.2 Basics in symbolic dynamics	10
2 Automorphisms	14
2.1 Introduction	14
2.1.1 Organization	15
2.2 Additional background	15
2.3 Notion of <i>Interpretation</i>	15
2.3.1 Interpretations and simple double interpretations	15
2.3.2 Reducible and irreducible simple double interpretations	18
2.4 Proof of main results	20
2.5 Proof of Proposition 2.6	22
2.5.1 Proof of Proposition 2.6	31
3 Symbolic factors	34
3.1 Introduction	34
3.1.1 Organization	35
3.2 Preliminaries	35
3.2.1 Basics in symbolic dynamics	36
3.3 Combinatorics on words lemmas	38
3.3.1 Lowering the rank	38
3.3.2 Periodicity lemmas	42
3.4 Rank of symbolic factors	43
3.4.1 Rank of factors of directive sequences	43
3.4.2 Rank of factors of \mathcal{S} -adic subshifts	45
3.5 Fibers of symbolic factors	51
3.6 Number of symbolic factors	53
3.6.1 Distal factor maps	54
3.6.2 Non-distal factor maps	56
3.6.3 Proof of main result	60
3.7 Appendix	61
3.7.1 Codings of subshifts	61

3.7.2	Factors of \mathcal{S} -adic sequences	63
4	A solution to the \mathcal{S}-adic conjecture	66
4.1	Preliminaries	68
4.1.1	Morphisms and codings	68
4.1.2	The complexity function	70
4.2	Some combinatorial lemmas	71
4.3	The classic coding based on special words	74
4.4	The first coding	75
4.4.1	Construction of the first coding	76
4.4.2	Basic properties of the first coding	78
4.4.3	Proof of Propositions 4.17 and 4.18	81
4.5	The second coding	85
4.5.1	Stable intervals	86
4.5.2	Construction of the second coding	89
4.5.3	Basic properties of the second coding	90
4.5.4	Proof of Propositions 4.28 and 4.29	93
4.6	The third coding	96
4.6.1	Construction of the third coding	97
4.6.2	Proof of Propositions 4.38, 4.39 and 4.40	98
4.7	The fourth coding	102
4.7.1	Construction of the fourth coding	103
4.7.2	Connecting two levels	107
4.8	Main Theorems	119
4.8.1	A set of sufficient conditions	119
4.8.2	Proof of the main theorems	128
4.9	Bounded alphabet structures	130
4.10	Applications	135
4.10.1	Cassaigne's Theorem	135
4.10.2	A theorem of Cassaigne, Frid, Puzynina and Zamboni	138
4.10.3	Topological rank	141
5	Perspectives and future work	142
5.1	More on symbolic factors	142
5.1.1	Symbolic factors of eventually dendric shifts	142
5.1.2	Symbolic factors of interval exchanges	143
5.2	More on the \mathcal{S} -adic conjecture	143
5.2.1	Applications of the structure theorems	143
5.2.2	Finite alphabet rank structures	143
	Bibliography	145
