# Table of Content

**1 Introduction** **1**
- 1.1 On Topology . . . 1
- 1.2 Topology in Condensed Matter Theory . . . 4
  - 1.2.1 The Su-Schrieffer-Heeger Model . . . 6
- 1.3 Mechanical Metamaterials . . . 10
- 1.4 Topological Mechanics . . . 12
- 1.5 Outline and Thesis Contribution . . . 14

**2 Topological Mechanics of Zero Modes** **15**
- 2.1 Zero Frequency Modes in Mechanical Lattices . . . 15
  - 2.1.1 Equilibrium and Compatibility Matrices . . . 15
  - 2.1.2 Zero Frequency Modes . . . 18
  - 2.1.3 Periodic Lattices . . . 19
- 2.2 Link Between Quantum and Classical problems . . . 21
  - 2.2.1 Symmetry Analysis . . . 23
- 2.3 Isostatic Topological Mechanics . . . 25
  - 2.3.1 Isostatic Chain . . . 25
  - 2.3.2 Topological Classification . . . 32
  - 2.3.3 Extension and Limitations . . . 32

**3 Hyperstatic Topological Mechanics** **34**
- 3.1 Hyperstatic Chain . . . 34
- 3.2 Topological Characterization of Non-Square Matrices . . . 37
  - 3.2.1 Classification . . . 37
  - 3.2.2 Topological Invariant . . . 38
- 3.3 Soft Interface Modes . . . 40
- 3.4 Important Remarks . . . 41

**4 Hyperstatic Chain Generalization** **44**
- 4.1 Multiple Chain System . . . 44
- 4.2 Topological Characterization . . . 46
- 4.3 Normalization Consideration . . . 48
- 4.4 Soft Modes in Multiple Chain System . . . 50
- 4.5 Localized Modes in Variable Stiffness Chain . . . 54

**5 Non-Linear Waves in Hyperstatic Chain** **59**
5.1 Brief Review of the Linkage Isostatic Chain . . . . . 59
5.2 Hyperstatic Case . . . . . 63

**6 Conclusions** **67**

**Bibliography** **69**
