|----------|--|----------|
| <b>1</b> | <b>Introduction</b>                                      | <b>1</b> |
| 1.1      | Motivation . . . . .                                     | 1        |
| 1.2      | Problem Statement . . . . .                              | 1        |
| 1.3      | Purpose statement . . . . .                              | 2        |
| 1.4      | Research questions . . . . .                             | 2        |
| 1.5      | Objectives . . . . .                                     | 2        |
| 1.6      | Importance of the research topic . . . . .               | 2        |
| 1.7      | Organization . . . . .                                   | 3        |
| <b>2</b> | <b>Systematic Literature Review</b>                      | <b>4</b> |
| 2.1      | Introduction . . . . .                                   | 4        |
| 2.2      | Review planning . . . . .                                | 4        |
| 2.2.1    | Objectives . . . . .                                     | 4        |
| 2.2.2    | Research questions . . . . .                             | 4        |
| 2.2.3    | Search strategy . . . . .                                | 5        |
| 2.2.4    | Study selection criteria . . . . .                       | 6        |
| 2.2.5    | Study selection process . . . . .                        | 6        |
| 2.2.6    | Study quality assessment . . . . .                       | 6        |
| 2.2.7    | Data extraction . . . . .                                | 6        |
| 2.2.8    | Data analysis . . . . .                                  | 7        |
| 2.3      | Results . . . . .  | 7        |
| 2.3.1    | Statistical results . . . . .                            | 7        |
| 2.3.2    | Data analysis results . . . . .                          | 8        |
| 2.3.2.1  | SDN overview . . . . .                                   | 8        |
| 2.3.2.2  | SDN applicability on WANs: Challenges overview . . . . . | 10       |
| 2.3.2.3  | Distributed Control Plane in WANs . . . . .              | 12       |
| 2.3.2.4  | Controller placement problem in WANs . . . . .           | 12       |
| 2.3.2.5  | Resilient SD-WANs . . . . .                              | 13       |
| 2.3.2.6  | Routing algorithms in SD-WANs . . . . .                  | 14       |
| 2.3.2.7  | Security in SD-WANs . . . . .                            | 14       |
| 2.3.2.8  | Disaster scenario in traditional WANs . . . . .          | 15       |
| 2.3.2.9  | SD-WANs for disaster scenarios . . . . .                 | 16       |
| 2.3.2.10 | SD-WAN and multiple Internet Service Providers . . . . . | 18       |
| 2.3.2.11 | SD-WAN implementation and testing . . . . .              | 18       |

| <b>3 Review Discussion</b>   | <b>22</b> |
| 3.1 Introduction . . . . .   | 22        |
| 3.2 Applicability of SDN on WANs . . . . .   | 22        |
| 3.3 Security on WANs . . . . .   | 22        |
| 3.4 Disaster resilient WANs . . . . .  | 22        |
| 3.4.1 Disaster detection in WANs . . . . .   | 23        |
| 3.4.2 Prioritization . . . . .   | 23        |
| 3.4.2.1 ID usage to determine prioritization . . . . .                                       | 23        |
| 3.4.2.2 Prioritization based on IP address versus packet content . . . . .                   | 24        |
| 3.4.2.3 Challenges of prioritization based on IP address and geographical location . . . . . | 24        |
| 3.4.3 Network configuration with multiple Internet Service Providers . . . . .               | 28        |
| 3.5 Implementation and testing . . . . .   | 28        |
| 3.5.1 Network simulator . . . . .  | 29        |
| 3.5.2 SDN Controller Platform . . . . .  | 29        |
| 3.5.3 SDN Controller Applications . . . . .  | 29        |
| 3.5.3.1 Ryu Controller Applications . . . . .  | 30        |
| 3.5.4 Data plane management with OpenFlow and controller applications . . . . .              | 30        |
| 3.5.4.1 OpenFlow's usable features for Prioritization management .                           | 31        |
| 3.5.5 Conclusion . . . . .   | 32        |
| <b>4 Framework Design</b>  | <b>33</b> |
| 4.1 Introduction . . . . .   | 33        |
| 4.2 Controller as a state machine . . . . .  | 33        |
| 4.2.1 State change trigger . . . . .   | 33        |
| 4.3 Network monitoring and notifications . . . . .   | 34        |
| 4.4 Databases . . . . .  | 35        |
| 4.4.1 In-network host IP Address DB . . . . .  | 35        |
| 4.4.2 ECS IP Address DB . . . . .  | 35        |
| 4.4.3 Disaster IP Address DB . . . . .   | 35        |
| 4.4.4 Disaster In Situ Controller DB . . . . .   | 35        |
| 4.5 Prioritization IDs . . . . .   | 36        |
| 4.6 ID assignment algorithm . . . . .  | 36        |
| 4.6.1 Algorithm for ID attachment . . . . .  | 36        |
| 4.7 Packet prioritization . . . . .  | 37        |
| <b>5 Framework Implementation</b>  | <b>38</b> |
| 5.1 Introduction . . . . .   | 38        |
| 5.2 Key technology . . . . .   | 38        |
| 5.2.1 SDN Hub Starter Kit . . . . .  | 38        |
| 5.3 Controller applications . . . . .  | 38        |
| 5.3.1 Disaster monitor application . . . . .   | 39        |
| 5.3.1.1 Switch counter class . . . . .   | 39        |
| 5.3.1.2 State module . . . . .   | 39        |
| 5.3.2 ID attachment application . . . . .  | 40        |
| 5.3.2.1 Flow entries management for ID attachment . . . . .                                  | 40        |
| 5.3.3 Prioritization application . . . . .   | 42        |

|  |   |           |
|--|---|-----------|
| 5.3.3.1  | Meter entries management . . . . .                                  | 43        |
| 5.3.3.2  | Flow entries management . . . . .                                   | 43        |
| 5.4  | Relation and dependency on other Ryu applications . . . . .         | 43        |
| 5.5  | Disaster resilient controller within the SDN architecture . . . . . | 44        |
| 5.6  | Source code . . . . .   | 44        |
| <b>6</b>   | <b>Testing and Results</b>  | <b>45</b> |
| 6.1  | Introduction . . . . .  | 45        |
| 6.2  | Key technology . . . . .  | 45        |
| 6.3  | Setup . . . . .   | 46        |
| 6.3.1  | Simple topology builder script . . . . .                            | 46        |
| 6.3.2  | Switch configuration script . . . . .                               | 46        |
| 6.3.3  | Ryu script . . . . .  | 46        |
| 6.4  | Test scenarios . . . . .  | 46        |
| 6.4.1  | Functional testing . . . . .  | 47        |
| 6.4.1.1  | Starting the controller . . . . .                                   | 47        |
| 6.4.1.2  | Switch discovery . . . . .  | 48        |
| 6.4.1.3  | Routing test . . . . .  | 49        |
| 6.4.1.4  | Switch failure and recovery . . . . .                               | 50        |
| 6.4.2  | Simulating a disaster scenario . . . . .                            | 51        |
| 6.4.2.1  | Multiple switch failure and recovery . . . . .                      | 52        |
| 6.4.2.2  | Traffic congestion . . . . .  | 55        |
| 6.5  | Limitations . . . . .   | 60        |
| 6.6  | Conclusions . . . . .   | 61        |
| <b>7</b>   | <b>Conclusions</b>  | <b>62</b> |
| 7.1  | Main contributions . . . . .  | 62        |
| 7.2  | Future and proposed work . . . . .                                  | 63        |
| <b>Bibliography</b>                                |   | <b>65</b> |
| <b>Annexes</b>                                     |   | <b>71</b> |
| <b>A Systematic review: Topic Summary</b>          |   | <b>71</b> |
| <b>B Results of traffic congestion experiments</b> |   | <b>73</b> |
| B.1  | Baseline scenario . . . . .   | 73        |
| B.2  | Baseline congested scenario . . . . .                               | 74        |
| B.3  | Baseline congested scenario with no meter support . . . . .         | 75        |
| B.4  | Disaster resilient controller: Experiment A . . . . .               | 76        |
| B.5  | Disaster resilient controller: Experiment B . . . . .               | 77        |
| B.6  | Disaster resilient controller: Experiment C . . . . .               | 78        |
