

Table of Contents

Introduction	<i>Rewriting Empiricism</i>	6
Chapter 1	<i>Reframing Cognitive Science</i>	9
Chapter 2	<i>From sensations to perceptions</i>	16
2.1.	Propagation, structure and decay	16
2.2.	True symbols: the neural code	19
2.3.	Sensory integration and interdependence	24
2.4.	A brief digression: tastes and emotions	28
2.5.	Overview	30
Chapter 3	<i>From perceptions to ideas</i>	32
3.1.	Working memory – long-term memory as the connectionist views it	34
3.2.	And then there’s the other memory distinction	36
3.3.	Of emergent modularization and the modularity of mind	46
3.4.	Of scaffolded decentralized systems	68
3.5.	Language acquisition, linguistic competence, and linguistic performance	77
3.5.1.	Generalization to unseen stimuli and the poverty of the stimulus argument	80
3.5.2.	The systematicity and productivity of connectionist architecture	93
3.5.3.	The pragmatism of a performance account of language	99
3.6.	Overview	111
Chapter 4	<i>From ideas to perceptions</i>	114
4.1.	In the absence of ideas	116
4.2.	Reasoning: meddling with the received view	119
4.3.	Reason in neural networks, human or otherwise	132
4.4.	Be reasonable: of constraints, scaffolds and perceptionless chatbots	137
4.5.	Overview	147
Epilogue	<i>The Overcoming of Empiricism</i>	150
