

# List of Tables

|      |  |     |
|------|--|-----|
| 2.1  | Software process lines as product lines. . . . .                                 | 17  |
| 3.1  | Decisions for Rhiscom's variable process elements. . . . .                       | 29  |
| 3.2  | Matching between UMA and eSPEM elements of ManagedContent. . . . .               | 44  |
| 3.3  | Matching between UMA and eSPEM elements of Core. . . . .                         | 45  |
| 3.4  | Matching between UMA and eSPEM elements of MethodPlugin. . . . .                 | 45  |
| 3.5  | Matching between UMA and eSPEM elements of MethodContent. . . . .                | 45  |
| 3.6  | Matching between UMA and eSPEM elements of ProcessStructure. . . . .             | 46  |
| 4.1  | Domain concepts. . . . .   | 61  |
| 4.2  | Semantic: Transformation Rules Language. . . . .                                 | 65  |
| 4.2  | Semantic: Transformation Rules Language. . . . .                                 | 66  |
| 4.2  | Semantic: Transformation Rules Language. . . . .                                 | 67  |
| 4.2  | Semantic: Transformation Rules Language. . . . .                                 | 68  |
| 4.3  | Concrete Syntax: Transformation Rules Language. . . . .                          | 69  |
| 5.1  | Summary of HOTS (adapted and updated from Tisi et al. [156]). . . . .            | 97  |
| 7.1  | Characteristics of the software companies. . . . .                               | 118 |
| 7.2  | Rhiscom's organizational context . . . . .                                       | 120 |
| 7.3  | Rhiscom's predefined contexts . . . . .  | 120 |
| 7.4  | Mobius' organizational context . . . . .   | 122 |
| 7.5  | Mobius' predefined contexts . . . . .  | 123 |
| 7.6  | Summary of sessions . . . . .  | 124 |
| 7.7  | Rhiscom's organizational software process reviewed. . . . .                      | 125 |
| 7.8  | Tailoring decisions for variable elements of Rhiscom's software process. . . . . | 126 |
| 7.9  | Decisions for Mobius' variable process elements. . . . .                         | 127 |
| 7.10 | Rhiscom's experimental project contexts. . . . .                                 | 129 |
| 7.11 | Mobius' experimental project contexts. . . . .                                   | 130 |
| 7.12 | Size of software processes. . . . .  | 130 |
| 7.13 | The weights of Rhiscom's context attributes. . . . .                             | 131 |
| 7.14 | Similarities between predefined and experimental contexts in Rhiscom. . . . .    | 131 |
| 7.15 | Mobius's organizational context model. . . . .                                   | 135 |
| 7.16 | Similarities between predefined and experimental contexts in Mobius. . . . .     | 135 |
| 7.17 | Comparison of the whole Mobius's process tasks in both strategies. . . . .       | 137 |
| 7.18 | Comparison of the whole Rhiscom process tasks in both strategies. . . . .        | 138 |

|      |   |     |
|------|---|-----|
| 8.1  | Validation factors of ATAGeTT . . . . .   | 143 |
| 8.2  | Validation factors of DL . . . . .  | 143 |
| 8.3  | Characteristics of Ki teknology. . . . .  | 144 |
| 8.4  | Number of employees of Ki teknology. . . . .  | 145 |
| 8.5  | Status of artifacts in Ki teknology. . . . .  | 146 |
| 8.6  | Summary of work sessions. . . . .   | 147 |
| 8.7  | Summary of revisions of Ki teknology's organizational software process. . . . .                         | 147 |
| 8.8  | Organizational context of Ki teknology . . . . .  | 149 |
| 8.9  | Tailoring Decisions of Ki teknology . . . . .   | 149 |
| 8.10 | Characteristics of data gathering. . . . .  | 158 |
| 8.11 | Activity timing for adapting the Ki agile software process to a concrete project context. . . . .       | 161 |
| 8.12 | Evaluation of timing for each activity that is used for the adapting Ki agile software process. . . . . | 162 |
