

# Isoepitaondiol, a diterpenoid of *Styopodium flabelliforme* and the insecticidal activity of stypotriol, epitaondiol and derivatives

Rovirosa, Juana

Sepulveda, Mauricio

Quezada, Elias

San-Martin, Aurelio

A new diterpenoid of mixed biogenesis; isoepitaondiol, has been isolated together with known diterpenoids and two chromones from the alga *Styopodium flabelliforme* collected at Easter Island.
