

Furoeremophilanes and other constituents from Chilean Senecio species

Jakupovic, J.

Grenz, M.

Bohlmann, F.

Niemeyer, H. M.

Investigation of five further Chilean Senecio species afforded, in addition to known compounds, four new furoeremophilanes, four eremophilanes, a germacatrienol and an acylpyrrol derivative.

Structures were elucidated by high field NMR techniques. © 1991.
